December 8, 2021 Revised August 18, 2022 Revised November 23, 2022 Project No. T-8424

Mr. Drew Zaborowski Avenue 55 600 University Street, Suite 2305 Seattle, Washington 98101

Subject: Critical Aquifer Recharge Areas Report

Redmond Flex/188

6900 – 188th Avenue Northeast

Redmond, Washington

City of Redmond File No. LAND-2021-00474

References: 1. Geotechnical Report, Redmond 188, Project No. T-8424, prepared by Terra Associates, Inc.,

dated October 12, 2022.

2. Memo, Storm Vault Excavation Seepage Evaluation, Redmond Flex/188, Project No. T-8424, prepared by Terra Associates, Inc., dated November 21, 2022.

Dear Mr. Zaborowski:

As requested, we performed an aquifer recharge and wellhead protection area review of the subject site. The purpose of our study was to determine if the site is located within the boundaries of aquifer recharge areas or wellhead protection areas as defined in Redmond Zoning Code (RZC) Chapter 21.64.050 (Critical Aquifer Recharge Areas) and to conduct a hydrogeologic assessment of the site in accordance with the requirements of RZC Appendix 1.A (Critical Areas Reporting Requirements – General Information) and Appendix 1.F (Critical Aquifer Recharge Areas [Wellhead Protection] Reporting Requirements). General project information required by Appendix 1.A of the RZC is provided in attached Appendix A.

Review of the Washington State Department of Health (WSDOH) Source Water Assessment Program (SWAP) interactive GIS mapping tool indicates that the site is not overlain by the wellhead protection zones of any Group A or Group B water systems. However, per RZC Table 21.64.050A, areas located outside of wellhead protection zone 3 (10-year horizontal time of travel) are considered to be within a Critical Aquifer Recharge Area (CARA) II when the site location provides a critical recharging effect on the aquifer. Review of the Redmond GIS property viewer website shows the site located within a CARA II. The position of the site relative to the City's CARA mapping and the time-of-travel plots of nearby water systems are shown on Figure 1. The SWAP map shows the site within the boundary of the Cedar-Sammamish Watershed.

SITE DESCRIPTION

The site is a vacant 5.85-acre parcel located east of and adjacent to 188th Avenue NE, approximately 140 to 470 feet north of the intersection with NE 67th Street in Redmond, Washington. The site location is shown on Figure 2.

The site is a former sand and gravel mine. Stereoscopic review of an aerial photo pair dated 1970 shows active surface mining on partitioned areas of the site. Review of aerial photographs available on the King County iMAP interactive mapping tool website indicates that the vast majority of the reclamation fill at the site was in place by 1998.

A mobile office trailer with a gravel parking area occupies the southwestern portion of the site. Localized areas in the central portion of the site are currently used for container storage and soil stockpiling. The eastern portion of the site is vegetated with grasses. Existing surface gradients are relatively flat. Surface elevations shown on the Redmond GIS Property Viewer website range from about Elev. 118 along the eastern site margin to about Elev. 110 near the northwestern property corner. An approximately 6- to 12-foot high soil berm is located on the adjacent properties along the eastern site margin and most of the northern site margin. Local topography generally slopes gently down to the northwest and the south from the northwestern and southeastern site margins, respectively. We did not observe any indications of surface water ponding or flow on the site.

The Redmond GIS Property Viewer website shows several environmentally-significant surface features located in the site vicinity. The type of surface feature, distance, general direction, and estimated topographic position relative to the site are given below: The approximate location of each surface feature relative to the site is shown on Figure 3.

Type of Feature	Distance (feet) ¹	Direction	Topographic Position Relative to Site
CARA II	1,150	Northwest	Downgradient
Class I Stream (Evans Creek)	1,350	East	Crossgradient
Class II Stream	1,400	East	Crossgradient
Class I Stream Buffer	1,340	Northeast	Crossgradient
FEMA Floodway	1,200	Northeast	Crossgradient
100-Year Floodplain	1,640	Southeast	Downgradient

^{1 –} Distance from site perimeter to closest edge of feature.

We evaluated site conditions for the presence of geologically hazardous areas as part of our geotechnical engineering study of the site. The results of our evaluation are discussed in Section 3.4 of the referenced geotechnical report.

PROJECT DESCRIPTION

A composite site plan prepared by Weber Thompson, dated May 28, 2021, shows the project consisting of a two-story, approximately 136,000-square-foot industrial flex building with associated access and utility improvements. The building is generally located in the north-central portion of the site with paved access and parking along the west, south, and east sides of the building. The proposed site development plan is shown on Figure 4.

A grading plan by Core Design, Inc. (Core), dated July 18, 2022, shows the main floor level of the building constructed at Elev. 116.25 except for a small area in the southeastern building corner that is at Elev. 118.25. Based on existing site elevations, maximum cuts and fills of about 2 to 4 feet will be required to achieve the design building pad and pavement elevations.

Development stormwater will be detained onsite in a buried vault for controlled release to an existing storm sewer. A plan sheet by Core Design titled Detention Vault Plan and Sections, dated July 18, 2022, shows the vault located west of the building in the northwestern portion of the site. The bottom of the vault is at Elev. 100.5, approximately 16 feet below existing grade.

SUBSURFACE CONDITIONS

Soils

We explored subsurface conditions at the site in six test pits excavated to depths of approximately 13.5 to 15 feet below ground surface (bgs) using a track-mounted excavator and in five test borings drilled to maximum depths of about 40.5 to 41.5 feet bgs with a track-mounted drill rig using hollow-stem auger drilling methods. The test pit and boring locations are shown on Figures 4 and 5. The Test Pit and Boring Logs are attached in Appendix B.

The soils observed in the subsurface explorations consist predominantly of reclamation fill composed of silty sand with gravel, silt with sand, silt, and localized layers of gravel with varying proportions of silt and sand. The fill soils typically contained scattered cobbles with occasional brick, wood, plastic, and metal debris. In the upper 25 to 30 feet, the fill was typically in a loose to medium dense, and moist to wet condition, with relatively dense/compact conditions below this depth. Materials interpreted to be fill extend the full depths of Test Borings B-1 and B-4 in the western portion of the site. Very dense, cemented, silty sand to sandy silt observed below depths of 40 feet and 35 feet in Borings B-2 and B-3, respectively, and medium dense gravelly silt with sand observed below a depth of 40 feet in Boring B-5, are interpreted to be native glacial deposits.

The Geologic map of the Redmond quadrangle, King County Washington, by J.P. Minard and Derek B. Booth (1988) shows site geology mapped as Vashon recessional outwash deposits of the Redmond delta subunit (Qvrd) described as stratified outwash sand and gravel with some silt and clay. As discussed, the site soils consist predominantly of fine-grained reclamation fills that were placed subsequent to the removal of the native sand and gravel deposits. Native soils encountered below the fill in several of the test borings consist of dense to very dense silt and cemented silty sand to sandy silt, indicating complete removal of the Qvrd deposits at those locations. Surficial geology mapped in the site vicinity is shown on Figure 6.

As discussed in Section 4.7 of the referenced geotechnical report, the fill materials observed in the subsurface explorations generally contain a moderate to high percentage of soil fines that would preclude using on-site infiltration for management of site stormwater.

Groundwater

Groundwater conditions encountered in our subsurface explorations consist of a shallow perched groundwater in the upper approximately 1 to 5 feet and localized wet soil zones below those depths. We expect that the shallow perched groundwater develops on a seasonal basis with highest levels occurring during the wet winter months and significantly diminishes levels or absence during the summer. The deeper wet soil zones encountered in the test borings are likely due to placing wet fill soils, placing fill during extended periods of wet weather, or extended exposure of in-place fills during the reclamation process. Based on local topography, we expect that the direction of shallow perched groundwater flow beneath the site is generally to the northwest from the northwestern portion of the site and to the south from the southeastern portion of the site.

SoundEarth Strategies, Inc. (SSI) installed monitoring wells in the northwestern (MW-01) and north-central (MW-02) portions of the subject site on July 1, 2022. Information provided by SSI indicates that both wells are screened between depths of 25 and 40 feet and finished with a surface-flush monument. The borings for MW-01 and MW-02 encountered soils described as silt and clay to depths of about 35 feet and 30 feet, respectively. The soil in the lower 5 feet of the MW-01 screened interval is described as medium-grained sand with silt. In MW-02, the lower 10 feet of the screened interval is set in interbedded fine- to coarse-grained sand with silt, clay, silty sand, and silt. We understand that groundwater levels measured in the wells on July 5, 2022 were 19.05 feet below top-of-casing (BTOC) in MW-01 and 21.73 feet BTOC in MW-02. We have not been provided with field-surveyed top-of-casing elevations; however, we expect that the top-of-casing reference points are within about 0.3 feet of the ground surface. The approximate locations of the two on-site SSI wells are shown on Figure 4 and Figure 7.

Review of a report titled Additional Remedial Investigation Report, FedEx Ground Distribution Center, by SLR, dated December 2017, indicates that groundwater levels measured in three monitoring wells (MW-4, MW-5, and MW-6) installed on the west-adjoining Fed Ex property ranged between Elev. 65.24 and Elev. 73.03 in August and September of 2017. These elevations correlate to depths of about 51 feet and 43 feet below ground surface at the subject site, and are slightly deeper than the termination depths of our on-site test borings and the on-site SSI monitoring wells. The approximate locations of the off-site SLR Wells MW-4 through MW-6 are shown on Figure 7.

A geologic profile (Section A-A') showing subsurface conditions observed in our site explorations, groundwater levels measured in on-site SSI Wells MW-01 and MW-02, and the range of measured groundwater levels projected from the west-adjoining FedEx property is attached as Figure 8. The plan view of Section A-A' is shown on Figure 4.

Hydrogeology

The City of Redmond Wellhead Protection Report (RWPR) recognizes three aquifers within the wellhead protection area. These include the Alluvial Aquifer, which is where the Redmond municipal wells produce from; Local Upland Aquifers, which occur within Vashon advance outwash (Qva) deposits that stratigraphically underlies Vashon till (Qvt) in upland areas; and Sea Level Aquifers that underlie the Qva and a deeper regional aquitard formed by transitional bed (Qtb) silt and clay.

Based on our study, native deposits consistent with the description of the Alluvial Aquifer are not present beneath the site. Documented wells closest to the site are completed between depths of about 70 and 170 feet in localized sand and gravel layers within soils described as hardpan. We interpret these deposits to be transitional between till and outwash, which is most consistent with the Local Upland Aquifer.

The City of Redmond's water supply wells are all completed in the Alluvial Aquifer at depths ranging from 41 to 67 feet below ground surface. All of the wells are located more than 3,500 feet northwest of the site. Based on the west-southwest direction of flow indicated by groundwater potentiometric surface elevations for the Alluvial Aquifer shown on Figure 4.4(a) (Alluvial and Upland Aquifers) of the RWPR, the locations of the City wells are generally crossgradient to the subject site. The approximate groundwater gradient in the Alluvial Aquifer shown crossing the site on Figure 4.4(a) is about 0.006. These conditions are generally consistent with the groundwater elevations, flow directions, and gradients developed from seasonal groundwater monitoring in City of Redmond monitoring wells constructed in the Alluvial Aquifer. Groundwater elevation contour maps developed by others from monitoring data collected in August 2010, August 2015, and February 2016 are attached in Appendix C. The City of Redmond monitoring wells contributing data to the generation of the groundwater elevation contour maps are all located more than 1,400 feet west and 2,800 feet north of the subject site.

The groundwater contour maps do not appear to have considered the groundwater levels measured in City of Redmond monitoring well MW-055, which is located about 1,300 feet south-southeast of the subject site. Measured groundwater levels in MW-055 in August 2015 and February 2016 are both listed as anomalously high, and are believed to represent a perched groundwater condition underlain by till with no influence from the alluvial aquifer. Based on its downgradient position relative to the subject site, and close proximity to a 30- to 40-foot high, south-facing slope, we expect that the general direction of perched groundwater flow at MW-055 would be to the south, away from the subject site. Based on these conditions and the heterogeneous nature of the fill soils in the site vicinity, it is unlikely that any correlation exists between the groundwater conditions at MW-055 and the subject site. The approximate location of MW-055 is shown on Figure 7.

WATER WELL REVIEW

We reviewed well log records available on the Washington State Department of Ecology (Ecology) Water Resources Program web site for existing water wells located within 1,300 feet of the site. The results of our search identified 65 wells potentially located within this search radius. Further review determined that all but two of the listed wells were either resource protection wells or geotechnical test borings misclassified on the driller's report as water wells. The two water-supply wells identified in the search are both located more than 2,300 feet from the site. Brief summaries of these wells are given below:

Daniel Martin Well (SW ¼ of NW ¼ of Section 7, Township 25N, Range 6E):

Located approximately 2,450 feet west-northwest and apparently crossgradient from the subject site. The well address is listed as 7018 – 180th Ave NE, Redmond, Washington. The well is an 8-inch diameter steel casing with casing perforations between depths of about 70 and 170 feet. The aquifer consists of localized sand and gravel layers within soil described as hardpan. The reported static groundwater level at the time of construction is 25 feet below ground surface.

Milton Bartholomy Well (SE ¼ of SW ¼ of Section 7, Township 25N, Range 6E):

Located approximately 2,540 feet southwest and apparently crossgradient from the subject site. The well address is listed as 18427 Redmond-Fall City Road, Redmond, Washington. The well is a 6-inch diameter steel casing that was advanced to a depth of 86 feet then pulled back to 77 feet. A gravel pack was added to the hole between depths of 76 and 86 feet while the casing was pulled. The aquifer is described as "flour silt and water" occurring between depths of about 76 and 80 feet. The reported static groundwater level at the time of construction is 45 feet below ground surface.

Documented well details and driller's logs are attached as Appendix D. The approximate well locations relative to the subject site are shown on Figure 9.

WELL WATER QUALITY REVIEW

As discussed, our research found no documented municipal- or domestic-use groundwater wells within 1,300 feet of the subject site. We researched available water quality data for drinking water sources located within Section 7, Township 25N, Range 6E using the Washington State Department of Health, Office of Drinking Water (ODW) web site (https://fortress.wa.gov/doh/eh/portal/odw/si/FindWaterSystem.aspx). No water quality records were found for drinking water sources located within this area search parameter.

SUMMARY OF EXISTING ENVIRONMENTAL REPORTS

SoundEarth Strategies, Inc. has conducted the following environmental studies of the subject site:

- 1. Phase I Environmental Site Assessment, by SoundEarth Strategies, Inc., dated November 16, 2020 (No copy)
- 2. Limited Subsurface Soil Investigation Report, by SoundEarth Strategies, Inc., dated July 29, 2021
- 3. Phase I Environmental Site Assessment, by SoundEarth Strategies, Inc., dated December 28, 2021
- 4. Exposure Pathway Evaluation Report, by SoundEarth Strategies, Inc., dated January 7, 2022

Copies of the SSI reports provided to us are attached in Appendix E.

The results of the Phase I Environmental Site Assessments (ESAs) identified the following recognized environmental condition (REC) at the subject site:

The confirmed presence of contaminated fill material.

"Aerial photographs suggest that the Property was historically part of the gravel mine that currently operates on adjoining properties. Commonly, imported fill material is used to replace the gravel that has been excavated and removed from such mines. Up to 35 feet of fill material was encountered during redevelopment of the west-adjoining property; impacts related to that fill material included petroleum hydrocarbons and cPAHs in soil and arsenic in groundwater.

SoundEarth Strategies, Inc. completed ten test pits at the Property in May and June 2021. Fill material was encountered throughout the test pits to the maximum depth of 5 feet bgs explored during that investigation. GRPH and ORPH were detected at concentrations below the applicable MTCA Method A cleanup levels in a test pit located on the western portion of the Property at approximately 5 feet bgs. The cPAH benzo(a)pyrene was detected at concentrations exceeding the applicable MTCA Method A cleanup level at approximately 1 foot bgs in two test pits located on the eastern portion of the Property; the benzo(a)pyrene concentration in a soil sample collected from a depth of 3 feet bgs in one of the test pits was below the applicable cleanup level. Considering these findings, the confirmed presence of contaminated fill material beneath the Property constitutes a REC."

The approximate locations of the SSI test pits and areas of known or potentially contaminated soil determined by SSI are shown on Figure 10. Tabulated soil analytical results are attached in Appendix F.

As discussed, SSI installed two monitoring wells on the subject site in July 2022. The analytical results of groundwater sampling from the on-site wells will be presented in SSI's forthcoming Soil Management Plan. Chemical analysis of groundwater samples collected from wells on the west-adjoining FedEx property detected concentrations of dissolved arsenic above Washington State Model Toxics Control Act (MTCA) Method A cleanup levels. Based on the proximity of the west-adjoining site, and uncertainties in the direction of groundwater flow in the site vicinity, there is the potential for arsenic to exist in groundwater beneath the site.

The potential presence and extent of cPAHs in soil at concentrations exceeding applicable cleanup levels, and characterization of site groundwater to determine the direction of groundwater flow beneath the site and the presence of dissolved arsenic were identified by SSI as remaining data gaps requiring further study. A scope of work proposed by SSI to address the remaining data gaps includes excavation of nine 5-foot deep test pits in previously unexplored locations with two soil samples per test pit submitted for laboratory analysis of cPAHs. Two 50-foot (depending on observed groundwater conditions) monitoring wells would be installed in the northern portion of the site to collect groundwater samples for analysis of dissolved arsenic.

Based on the results of the above-referenced studies, SSI proposed measures for management and disposal of cPAH-contaminated soil that may be encountered during site excavation and grading to mitigate potential exposure risks. Any excavated soil with cPAH concentrations exceeding the MTCA Method A cleanup level will be handled as Class 3 contaminated material and will be transported to a Resource Conservation and Recovery Act (RCRA) Subtitle D (non-hazardous waste) landfill for proper disposal.

Any residual contaminated soil that may remain in place following redevelopment activities would be managed through the use of engineering and institutional controls. The majority of the developed property will be covered by the building or paved parking and driveway areas, which would serve as a cap preventing direct contact with residual contaminated soil. An environmental covenant would be recorded for the property to ensure that conditions remain protective of human health and the environment. Given the nature of the contaminants of concern and the evaluation of applicable exposure pathways, it is SSI's opinion that the proposed engineering and institutional controls would effectively mitigate the exposure risk for potential receptors at the site.

DISCUSSION

Hydrogeologic conditions at the subject site and on adjacent properties have been significantly altered incidental to past surface mining of the outwash sand and gravel deposits and subsequent placement of reclamation fills. Based on our study, it appears that the vast majority of the native outwash sand and gravel deposits were removed to elevations exposing a subgrade of dense to very dense silt and cemented silty sand and then replaced to current grades with reclamation fills consisting primarily of silt and silty sand. Because the hydraulic conductivity of the fine-grained reclamation fill is significantly lower than the permeable native outwash deposits, it is our opinion that the contribution of existing onsite groundwater recharge to the Alluvial Aquifer would be significantly reduced, and potentially eliminated, from pre-mined conditions. Alterations of surface grades associated with the reclamation fills in the site vicinity and new development on adjacent properties may also have contributed to a reduction of groundwater recharge at the site.

As discussed, groundwater at the site exists in the form of a shallow seasonal perched groundwater table in the upper approximately 1 to 5 feet and localized perched zones within the low-permeability fill materials. With the relatively flat site grades and limited hydraulic conductivity of the fill soils, we expect that most of the shallow perched groundwater is consumed by evapotranspiration during the dry summer months before having any opportunity to recharge the Local Upland Aquifer below the site. In our opinion, the localized perched groundwater in the deeper fill soils is likely residual moisture incurred during fill placement and has little effect on aquifer recharge.

Elevated concentrations of cPAHs have been detected in shallow soil samples at the site; however, due to its very low solubility, cPAHs do not readily degrade and are persistent in the environment. Based on this, and the site conditions discussed in the previous paragraph, it is our opinion that the presence of cPAHs in shallow soils at the site has no adverse impact to water quality in the Alluvial or Local Upland Aquifers.

In our opinion, the proposed development would not result in adverse impacts to existing groundwater recharge of nearby surface water features, including Evans Creek and its associated Class I stream buffer and FEMA Floodway located more than 1,200 feet east-northeast and apparently crossgradient from the site, and the 100-Year Floodplain located about 1,640 feet southeast and apparently downgradient from the site.

With the relatively flat topography, it is our opinion that the potential for erosion to occur at the site is low, even during construction. The potential for adverse impacts to the site resulting from erosion during construction would be adequately mitigated with proper implementation and maintenance of BMPs for erosion prevention and sedimentation control outlined in the required project construction stormwater pollution prevention plan (SWPPP).

Based on the nature of the proposed site development and the relatively flat site topography, we do not expect that site grading would require importing volumes of material for use as structural fill. If the importing of fill material from off-site sources is necessary, the requirements of Redmond Municipal Code (RMC) Chapter 15.24.095(2) (Wellhead Protection Zones 1 and 2 performance standards [Fill Material]) must be followed. As discussed, a Soil Management Plan providing guidance and direction for management and disposal of contaminated soil encountered during site development is forthcoming.

We expect that the excavation for stormwater detention vault construction will intercept localized perched groundwater zones; however, the volume of water and rate of seepage flow into the excavation is expected to be relatively minor. For conditions observed in the vault location, we estimate that total excavation seepage volumes would be less than 0.01 gallons per minute (gpm). We recognize that higher initial seepage flow rates may occur from localized zones of more permeable soils within the sandy silt materials; however, seepage volumes and flow rates from these laterally discontinuous zones are expected to rapidly diminish.

If it becomes necessary to remove accumulated seepage from the excavation to facilitate construction, conventional contractor means and methods to collect and convey surface water to a sump where the water can be pumped out of the excavation should be capable of maintaining a relatively dry excavation for construction purposes. Typically, this would be accomplished by excavating shallow trenches or swales that collect surface water near the excavation perimeter and convey to water to one or more sumps at convenient locations in the excavation. An electrical submersible trash pump or conventional gas-engine trash pump would be operated as needed to empty the sump. All water pumped from the excavation should be contained onsite for characterization prior to release into the storm sewer system or off-site disposal. Water intended for discharge to the City of Redmond storm sewer system will be analyzed according to the Administrative Order parameters and discharge requirements. The expected analyses will include the site contaminants of concern. Alternative off-site water disposal will require analysis in accordance with the disposal facility's testing requirements.

With the relatively minor seepage volumes expected in the storm vault excavation, discharge pumping rates would never approach 500 gallons per minute (gpm). However, in the event that unforeseen conditions are encountered where alternative dewatering measures requiring significantly higher pumping rates, such as perimeter wellpoint or deep pumping well systems, construction will be paused to allow evaluation of the changed conditions and determination of appropriate dewatering measures. Alternative dewatering systems resulting in discharge pumping rates in excess of 500 gpm will require City of Redmond notification and submittal of a temporary construction dewatering (TCD) plan for City of Redmond review and approval.

In our opinion, potential hazards associated with the use of equipment fuels and lubricants at the site during construction would be adequately mitigated with proper implementation and maintenance of BMPs for spill prevention and recovery of hazardous materials during construction outlined in the project SWPPP.

Potential post-development impacts to groundwater at the site would be in the form of trace petroleum hydrocarbons and trace metals from roadway and parking area runoff, and typical landscape products in the form of fertilizers, pesticides, and other landscaping chemicals. Because the proposed development is for commercial office/warehouse use, it is not expected that any deleterious substances and hazardous materials used by site maintenance and landscape subcontractors would be stored on site or used in significant amounts. In our opinion, specific recommendations for storage or handling of typical volumes of these materials for landscape and maintenance purposes, in typical residential volumes, is not warranted. Additionally, trace petroleum products and many common pesticides are readily degradable in the natural environment when dilute, and metals and pesticides are typically filtered by sorption in the upper portion of the soil column.

Potential impacts to site groundwater from a spill or leak from a permanent, diesel-fueled backup generator, if utilized at the site, can be adequately mitigated by implementing source control best management practices (BMPs) for fueling at dedicated stations (and above-ground and underground fuel storage facilities) as outlined in Volume IV, Chapter 6 of the 2019 *Stormwater Management Manual for Western Washington*. Applicable operational BMPs would include the following:

- Prepare an emergency spill response and cleanup plan (spill plan) per S426 BMPs for Spills of Oil and Hazardous Substances.
- Train employees on the proper use of fuel dispensers and on the spill plan.
- Have a designated trained person(s) available either on site or on call at all times to implement the spill plan promptly and properly and immediately cleanup all spills.
- The person conducting the fuel transfer must be present at the fueling pump during fuel transfer, particularly at unattended or self-serve stations.
- Keep suitable cleanup materials, such as dry adsorbent materials, on site to allow prompt cleanup of a spill.
- Do not use dispersants to clean up spills or sheens unless properly removed for disposal following application. Dispersants are not allowed to enter storm drains, surface waters, treatment systems, or sanitary sewers.
- Post signs in accordance with the requirements in the Uniform Fire Code (UFC) or International Fire Code (IFC). For example, post "No Topping Off" signs (topping off gas tanks causes spillage and vents gas fumes to the air).

Applicable Structural Source Control BMPs for new fueling stations would include the following:

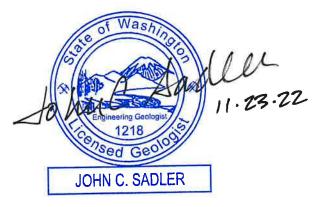

- Slope the concrete containment pad around the fuel tank toward drains; either trench drains, catch basins and/or a dead-end sump. The slope of the drains shall not be less than 1 percent (Section 7901.8 of the UFC, Section 5703.6.8 of the IFC).
- Drains from containment pads must have a normally closed shutoff valve. The valve may be opened to convey contaminated stormwater to oil removal treatment such as an API or CP oil/water separator (see V-13 Oil and Water Separator BMPs), catch basin insert, or equivalent treatment, and then to a basic treatment BMP (as described in III-1.2 Choosing Your Runoff Treatment BMPs) or to a sanitary sewer, if approved by the sewer authority. Discharges from treatment systems to storm sewer or surface water or to the ground must not display ongoing or recurring visible sheen and must not contain a significant amount of oil and grease.
- The spill control capacity must be sized in compliance with Section 7901.8 of the UFC. The spill control capacity may be acquired by either an underground system including a sump, or an above ground containment area consisting of a containment pad with berms.
- The fueling island may be designed as a spill containment pad with a sill or berm raised to a minimum of four inches (per Section 7901.8 of the UFC) to prevent the runoff of spilled liquids and to prevent run-on of stormwater from the surrounding area. All stormwater collected on the containment pad must discharge to treatment with a normally closed valve downstream of the treatment.
- The fueling pad must be paved with Portland cement concrete, or equivalent. Asphalt pavement is not considered an equivalent material.

Based on our review, and provided appropriate BMPs are implemented as discussed above, it is our opinion that the use of a permanent diesel-fueled emergency generator at the site would not result in any significant adverse impacts to water quality in the Alluvial and Local Upland Aquifers.

We trust the information presented is sufficient for your current needs. If you have any questions or require additional information, please call.

Sincerely yours,

TERRA ASSOCIATES, INC.

# ${\bf SOUNDEARTH\ STRATEGIES, INC.\ REPORTS}$

July 29, 2021

Mr. Drew Zaborowski Avenue 55, LLC 600 University Street, Suite 2305 Seattle, Washington 98101

SUBJECT: LIMITED SUBSURFACE SOIL INVESTIGATION REPORT

**Redmond Flex** 

6900 188th Avenue Northeast Redmond, Washington 98052 **Project Number: 0970-012-02** 

Dear Mr. Zaborowski:

SoundEarth Strategies, Inc. (SoundEarth) has prepared this letter to present the results of the limited subsurface soil investigation (the SSI) activities performed at the Redmond Flex property at the address listed above in Redmond, Washington (the Property; Figure 1). The SSI was performed to evaluate soils at the Property ahead of planned construction and determine if subsurface fill material beneath the Property contains concentrations of contaminants above the Washington State Model Toxic Control Act (MTCA) cleanup levels.

#### **PROPERTY DESCRIPTION**

The Property currently consists of an irregular-shaped tax parcel (King County Parcel No. 128630-0012) that covers approximately 254,687 square feet (5.85 acres) of land in Township 25 North, Range 6 East, Section 25 (SoundEarth 2020). Based on the King County iMap, the Property has an elevation of approximately 115 to 120 feet above mean sea level. The highest elevation is on the northeastern portion of the Property.

The Property is currently undeveloped. Several temporary structures and storage containers are present including a mobile office trailer, sheds, dumpsters, truck and semi-trailers, and heavy equipment. Adjoining properties include gravel pits and associated areas operated by the Cadman Gravel Company to the north and east, Southeast Redmond Park to the south, and 188th Avenue Northeast followed by a Fed Ex Distribution Center to the west. Land use on surrounding properties is commercial, recreational, and mining.

The Property is planned to be redeveloped with one building and an associated parking lot, access road, and stormwater vault. Construction of the building would require excavation to a maximum of 9 feet below ground surface (bgs) in the area of a proposed stormwater vault on the northwestern portion of the Property.

#### HISTORICAL USES OF THE PROPERTY

Based on the prior Phase I Environmental Site Assessment (ESA) conducted by SoundEarth in 2020, the Property was undeveloped from at least 1885 to 1943. Between 1965 and 1985, tree clearing occurred, and the Property was used for agricultural purposes and for access roads to adjoining properties. As of 1990, the access roads and tree clearing were likely associated with the adjoining gravel mining operation. By at least 2001, the Property was occupied by Cadman Gravel Company. From 2009 to 2019, the western portion of the Property was occupied by a mobile building and gravel parking lot. The central portion of the Property was occupied by a storage yard.

#### PREVIOUS ENVIRONMENTAL REPORT

The prior environmental investigation completed at the Property is summarized below.

#### 2020 SoundEarth Phase I Environmental Site Assessment

SoundEarth conducted a Phase I ESA on the Property, dated November 16, 2020. A recognized environmental condition (REC) was identified as follows:

The potential presence of fill material beneath the Property. Based on aerial photographs, the property was historically part of the operational gravel mine currently operating on adjoining properties (north and east). As a result, fill material may have been added. During the Property reconnaissance, the adjoining properties to the north and east were at a significantly higher grade, suggesting that material may have been graded or added in the vicinity of the Property. In addition, up to 35 feet of fill material was encountered during redevelopment of the west-adjoining property. Impacts related to that fill material included petroleum hydrocarbons and carcinogenic polycyclic aromatic hydrocarbons (cPAHs) in soil and arsenic in groundwater. The arsenic impacted groundwater was reportedly a result of storm and process water discharged to groundwater from the nearby Cadman gravel mine. Conditions beneath the Property are potentially similar to those beneath the west-adjoining property. Therefore, the potential presence for fill material beneath the Property constitutes a REC.

#### LIMITED SUBSURFACE SOIL INVESTIGATION RESULTS

SoundEarth completed seven shallow test pits (TP01 through TP07) on the Property on May 12, 2021. The test pits ranged in depths from 3 to 5 feet bgs. Test pit locations were selected based on areas likely to be graded during planned redevelopment activities. Test pit locations are shown on the attached Figure 2. Soil conditions generally consisted of fill material including well-graded gravel with sand, clayey or silty sand with gravel, and poorly graded sand with gravel. Groundwater was not observed except in test pit TP02 at approximately 2.5 feet bgs. There were no obvious visual or olfactory indications of soil contamination, including odors, sheens, or staining. Soil analytical results are summarized in Tables 1 through 3 and discussed below.

A slight detection of gasoline was detected at a concentration of 12 milligrams per kilogram (mg/kg) in TP01-05 at approximately 5 feet bgs, which is less than the MTCA Method A cleanup level of 100 mg/kg (with no benzene detected). Oil was also detected in sample TP01-05 at the same depth at a concentration of 350 mg/kg, which is also below the MTCA Method A cleanup level of 2,000 mg/kg. TP01 was located within the proposed stormwater retention vault located on the northwest portion of the Property.

Petroleum was not detected in any of the samples collected from test pits TP02 through TP06. Metals were detected in all of the soil samples, but at concentrations typical of background levels. No detections of cPAHs were found in samples collected from TP01 through TP06. Based on these data, no special provisions are recommended from soil generated from areas at and surrounding TP02 through TP06 unless suspect contamination is observed during grading activities. Soil with detectable concentrations of petroleum that are generated and intended for export from the Property around TP-01, may need to be segregated and disposed at a disposal facility that accepts Class 2 petroleum waste.

Test pit TP07, located on the eastern portion of the Property, had a cPAH concentration of 0.13 mg/kg, which is slightly above the MTCA Method A cleanup level of 0.1 mg/kg. The sample containing the cPAH exceedance was collected from approximately 1 foot bgs. SoundEarth returned to the Property on June 4, 2021, to assess the extent of the cPAH exceedance. Three additional test pits were advanced (TP08 through TP10), each approximately 15 feet away from TP07. One sample was collected within TP07 to determine if the contamination exceeded deeper than 1 foot bgs, and one sample was collected from each of three test pits: TP08, TP09 and TP10. Results of the June 4th investigation revealed that cPAHs at concentrations above the MTCA Method A cleanup level did not extend deeper than approximately 3 feet bgs but did extend laterally towards the southwest at concentrations above the MTCA Method A cleanup level. A copy of the May 12 and June 4, 2021, investigation laboratory reports are included as Attachment A.

#### **RECOMMENDATIONS**

The recommended next steps include the following:

- 1. Petroleum-impacted soil excavated from the proposed stormwater vault, which is located on the northwestern portion of the Property, should be profiled and disposed at a permitted facility rather than a clean fill site. Regulatory reporting is not currently necessary because petroleum concentrations are below cleanup levels.
- 2. The extent of shallow cPAH contamination surrounding TP07, located on the eastern portion of the Property, is unknown. We recommend assessing soil conditions during redevelopment activities. Soil generated from this area should be transported to a Resource Conservation Recovery Act (RCRA) Subtitle D (non-hazardous) facility for disposal.
- Create a soil management plan to provide guidance and direction to the earthwork contractor during redevelopment activities.
- 4. Create a final closeout report that documents the investigations conducted to date, future remedial excavation observations, sample analysis, and disposal records.

#### **LIMITATIONS**

The services described in this report were performed consistent with generally accepted professional consulting principles and practices. No other warranty, express or implied, is made. These services were performed consistent with SoundEarth's agreement with the client. This report is solely for the use and information of the client unless otherwise noted. Any reliance on this report by a third party is at such party's sole risk.

Opinions and recommendations contained in this report are derived, in part, from data gathered by others, and from conditions evaluated when services were performed, and are intended only for the

client, purposes, locations, time frames, and project parameters indicated. SoundEarth does not warrant and is not responsible for the accuracy or validity of work performed by others, nor from the impacts of changes in environmental standards, practices, or regulations subsequent to performance of services. SoundEarth does not warrant the use of segregated portions of this report.

#### **CLOSING**

SoundEarth appreciates the opportunity to work with you on this project. Please contact the undersigned at 206-306-1900 if you have any questions or require additional information.

Respectfully,

SoundEarth Strategies, Inc.

MTCA Cleanup Lev	el for Soil		NE	NE	<b>0.1</b> ⁽²⁾	NE	NE	NE	NE	<b>0.1</b> ⁽²⁾

#### NOTES:

Red denotes concentration exceeds MTCA cleanup level for soil.

Sample analyses conducted by Friedman & Bruya, Inc. of Seattle, WA.

Samples analyzed by EPA Method 8270E.

⁽¹⁾Analytical result for each individual cPAH is multiplied by the TEF and all seven cPAH values are added. When analytical results are reported as less than the LRL, one-half of the LRL is multiplied by the TEF to calculate the TEQ.

⁽²⁾MTCA Cleanup Regulation, Chapter 173-340-900 of WAC, Table 740-1 Method A Cleanup Levels for Soil, Unrestricted Land Uses, revised November 2007.

< = not detected at a concentration exceeding the laboratory reporting limit

 ${\sf cPAH} = {\sf carcinogenic\ polycyclic\ aromatic\ hydrocarbon}$ 

EPA = US Environmental Protection Agency

MTCA = Washington State Model Toxics Control Act

NE = not established

TEF = toxicity equivalency factor

TEQ = toxicity equivalent

WAC = Washington Administrative Code

May 21, 2021

Corey League, Project Manager SoundEarth Strategies 2811 Fairview Ave. East, Suite 2000 Seattle, WA 98102

Dear Mr League:

Included are the results from the testing of material submitted on May 12, 2021 from the SOU_0970-017-02_ 20210512, F&BI 105213 project. There are 29 pages included in this report. Any samples that may remain are currently scheduled for disposal in 30 days, or as directed by the Chain of Custody document. If you would like us to return your samples or arrange for long term storage at our offices, please contact us as soon as possible.

We appreciate this opportunity to be of service to you and hope you will call if you should have any questions.

Sincerely,

FRIEDMAN & BRUYA, INC.

Michael Erdahl Project Manager

## CASE NARRATIVE

This case narrative encompasses samples received on May 12, 2021 by Friedman & Bruya, Inc. from the SoundEarth Strategies SOU_0970-017-02_ 20210512, F&BI 105213 project. Samples were logged in under the laboratory ID's listed below.

<u>Laboratory ID</u>	SoundEarth Strategies
105213 -01	TP01-02
105213 -02	TP01-05
105213 -03	TP02-2.5
105213 -04	TP02-05
105213 -05	TP03-01
105213 -06	TP03-03
105213 -07	TP04-01
105213 -08	TP04-03
105213 -09	TP05-01
105213 -10	TP05-03
105213 -11	TP06-01
105213 -12	TP06-03
105213 -13	TP07-01
105213 -14	TP07-02

All quality control requirements were acceptable.

#### **ENVIRONMENTAL CHEMISTS**

## **Data Qualifiers & Definitions**

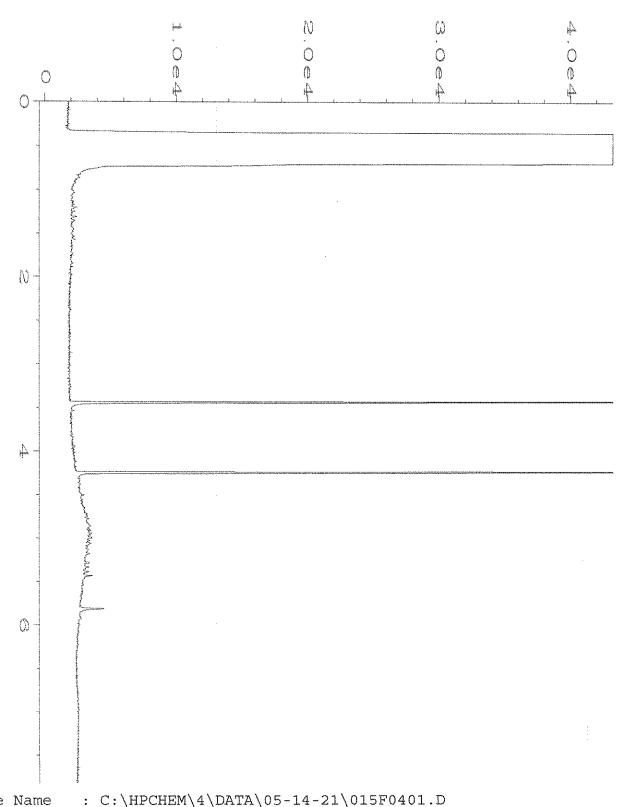

- a The analyte was detected at a level less than five times the reporting limit. The RPD results may not provide reliable information on the variability of the analysis.
- b The analyte was spiked at a level that was less than five times that present in the sample. Matrix spike recoveries may not be meaningful.
- ca The calibration results for the analyte were outside of acceptance criteria. The value reported is an estimate.
- c The presence of the analyte may be due to carryover from previous sample injections.
- cf The sample was centrifuged prior to analysis.
- d The sample was diluted. Detection limits were raised and surrogate recoveries may not be meaningful.
- dv Insufficient sample volume was available to achieve normal reporting limits.
- f The sample was laboratory filtered prior to analysis.
- fb The analyte was detected in the method blank.
- fc The analyte is a common laboratory and field contaminant.
- hr The sample and duplicate were reextracted and reanalyzed. RPD results were still outside of control limits. Variability is attributed to sample inhomogeneity.
- hs Headspace was present in the container used for analysis.
- ht The analysis was performed outside the method or client-specified holding time requirement.
- ip Recovery fell outside of control limits due to sample matrix effects.
- j The analyte concentration is reported below the lowest calibration standard. The value reported is an estimate.
- J The internal standard associated with the analyte is out of control limits. The reported concentration is an estimate.
- $\rm jl$  The laboratory control sample(s) percent recovery and/or RPD were out of control limits. The reported concentration should be considered an estimate.
- js The surrogate associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- lc The presence of the analyte is likely due to laboratory contamination.
- L The reported concentration was generated from a library search.
- nm The analyte was not detected in one or more of the duplicate analyses. Therefore, calculation of the RPD is not applicable.
- pc The sample was received with incorrect preservation or in a container not approved by the method. The value reported should be considered an estimate.
- ve The analyte response exceeded the valid instrument calibration range. The value reported is an estimate.
- vo The value reported fell outside the control limits established for this analyte.
- x The sample chromatographic pattern does not resemble the fuel standard used for quantitation.

Corey League, Project Manager SoundEarth Strategies 2811 Fairview Ave. East, Suite 2000 Seattle, WA 98102

Dear Mr League:

Included are the results from the testing of material submitted on June 4, 2021 from the SOU_0970-017-03_ 20210604, F&BI 106077 project. There are 8 pages included in this report. Any samples that may remain are currently scheduled for disposal in 30 days, or as directed by the Chain of Custody document. If you would like us to return your samples or arrange for long term storage at our offices, please contact us as soon as possible.

We appreciate this opportunity to be of service to you and hope you will call if you should have any questions.

Sincerely,

FRIEDMAN & BRUYA, INC.

Michael Erdahl Project Manager

## CASE NARRATIVE

This case narrative encompasses samples received on June 4, 2020 by Friedman & Bruya, Inc. from the SoundEarth Strategies SOU_0970-017-03_ 20210604, F&BI 106077 project. Samples were logged in under the laboratory ID's listed below.

<u>Laboratory ID</u>	SoundEarth Strategies
106077 -01	TP07-03
106077 -02	TP07-05
106077 -03	TP08-01
106077 -04	TP08-03
106077 -05	TP09-01
106077 -06	TP09-03
106077 -07	TP10-01
106077 -08	TP10-03

All quality control requirements were acceptable.

#### **ENVIRONMENTAL CHEMISTS**

### **Data Qualifiers & Definitions**

- a The analyte was detected at a level less than five times the reporting limit. The RPD results may not provide reliable information on the variability of the analysis.
- b The analyte was spiked at a level that was less than five times that present in the sample. Matrix spike recoveries may not be meaningful.
- ca The calibration results for the analyte were outside of acceptance criteria. The value reported is an estimate.
- c The presence of the analyte may be due to carryover from previous sample injections.
- cf The sample was centrifuged prior to analysis.
- d The sample was diluted. Detection limits were raised and surrogate recoveries may not be meaningful.
- dv Insufficient sample volume was available to achieve normal reporting limits.
- f The sample was laboratory filtered prior to analysis.
- fb The analyte was detected in the method blank.
- fc The analyte is a common laboratory and field contaminant.
- hr The sample and duplicate were reextracted and reanalyzed. RPD results were still outside of control limits. Variability is attributed to sample inhomogeneity.
- hs Headspace was present in the container used for analysis.
- ht The analysis was performed outside the method or client-specified holding time requirement.
- ip Recovery fell outside of control limits due to sample matrix effects.
- j The analyte concentration is reported below the lowest calibration standard. The value reported is an estimate.
- J The internal standard associated with the analyte is out of control limits. The reported concentration is an estimate.
- $\rm jl$  The laboratory control sample(s) percent recovery and/or RPD were out of control limits. The reported concentration should be considered an estimate.
- js The surrogate associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- lc The presence of the analyte is likely due to laboratory contamination.
- L The reported concentration was generated from a library search.
- nm The analyte was not detected in one or more of the duplicate analyses. Therefore, calculation of the RPD is not applicable.
- pc The sample was received with incorrect preservation or in a container not approved by the method. The value reported should be considered an estimate.
- ve The analyte response exceeded the valid instrument calibration range. The value reported is an estimate.
- vo The value reported fell outside the control limits established for this analyte.
- x The sample chromatographic pattern does not resemble the fuel standard used for quantitation.

#### **EXECUTIVE SUMMARY**

Avenue 55, LLC commissioned SoundEarth Strategies, Inc. (SoundEarth) to complete a Phase I Environmental Site Assessment of the Redmond Flex property located at 6900 188th Avenue Northeast in Redmond, Washington (the Property). The purpose of this environmental site assessment is to identify, to the extent feasible, recognized environmental conditions that may have resulted from the use, manufacture, storage, and/or disposal of hazardous or toxic substances that could affect the future acquisition and/or development of the Property. The scope of work included a review of historical documents regarding the Property, review of current federal and state lists citing known and potentially contaminated sites, interviews with present owners and site managers, a Property reconnaissance, and preparation of this report.

Based on information reviewed during this investigation and as discussed further in this report, it appears that the Property was initially used for agricultural purposes by at least 1965. By at least 1977, however, the Property appeared to be vacant and undeveloped. Various dirt roads appear to have been located on the Property between the late 1970s and the 1990s. The Property appears to have been part of an adjoining gravel mine in at least 1990, but the Property was again vacant and undeveloped between at least 1998 and 2007. Between at least 2009 and 2019, it appears that an office trailer and a gravel parking lot were located on the western portion of the Property. At the time of the Property visit, the Property was occupied by a few temporary structures and storage containers. Adjoining properties include a mix of industrial and commercial development.

The following recognized environmental condition was identified during the course of our investigation:

The confirmed presence of contaminated fill material beneath the Property. Aerial photographs suggest that the Property was historically part of the gravel mine that currently operates on adjoining properties. Commonly, imported fill material is used to replace the gravel that has been excavated and removed from such mines. Up to 35 feet of fill material was encountered during redevelopment of the west-adjoining property. Impacts related to that fill material included petroleum hydrocarbons and carcinogenic polycyclic aromatic hydrocarbons (cPAHs) in soil and arsenic in groundwater. SoundEarth completed 10 test pits at the Property in May and June 2021. Fill material was encountered throughout the test pits to the maximum depth explored during that investigation at 5 feet below ground surface (bgs) . Gasoline- and oil-range petroleum hydrocarbons were detected at concentrations below the applicable Washington State Model Toxics Control Act (MTCA) Method A cleanup levels in a test pit located on the western portion of the Property at approximately 5 feet bgs. The cPAH benzo(a)pyrene was detected at concentrations exceeding the applicable MTCA Method A cleanup level at approximately 1 foot bgs in two test pits located on the eastern portion of the Property; the benzo(a)pyrene concentration in a soil sample collected from a depth of 3 feet in one of the test pits was below the applicable MTCA cleanup level. Considering these findings, the confirmed presence of contaminated fill material beneath the Property constitutes a recognized environmental condition.

This executive summary is presented solely for introductory purposes and the information contained in this section should be used only in context with the entirety of this report. A complete description of the project, Property conditions, investigative methods, and investigation results is contained within this report.

#### 1.0 INTRODUCTION

#### 1.1 PURPOSE OF ASSESSMENT

SoundEarth Strategies, Inc. (SoundEarth) was commissioned by Avenue 55, LLC to complete a Phase I Environmental Site Assessment (ESA) of the Redmond Flex property located at 6900 188th Avenue Northeast in Redmond, Washington (the Property). The primary purpose of this ESA is to identify, to the extent feasible, recognized environmental conditions (RECs) resulting from the use, manufacture, storage, and/or disposal of hazardous or toxic substances that could affect the future acquisition and/or development of the Property.

This study is intended to satisfy the level of effort often referred to as "all appropriate inquiry" in the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Section 9601 of Chapter 103 of Title 42 of the US Code, with the objective of allowing Avenue 55, LLC to comply with lender requirements as part of the planned redevelopment of the Property.

#### 1.2 METHODOLOGY/SCOPE OF WORK

This Phase I ESA was conducted in accordance with procedures outlined in ASTM International (ASTM) E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. ASTM E1527-13 uses the term "recognized environmental conditions" to assess environmental risks associated with a property. The term is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Two additional categories of RECs are included in ASTM E1527-13: historical recognized environmental conditions (HRECs) and controlled recognized environmental conditions (CRECs). ASTM E1527-13 uses the term "historical recognized environmental condition" to define environmental risks associated with "...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls." A "controlled recognized environmental condition" is defined as "...a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority...with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

The scope of work for this Phase I ESA included the following tasks:

A review of various sources of historical information dating back to 1885, which are identified in Section 4.0, including reverse city street directories (such as those published by Polk, Inc.), Sanborn Fire Insurance Maps (Sanborn Maps), Kroll Atlases, local planning and assessment records, and available aerial photographs of the Property and vicinity.

- A review of current federal databases, including the US Environmental Protection Agency (EPA) Superfund Enterprise Management System (SEMS) database, the EPA National Priority List (NPL), the EPA Resource Conservation and Recovery Act (RCRA) Notifiers, the RCRA Corrective Action Report, the Facility Index System (FINDS), the Emergency Response Notification System (ERNS), and other lists.
- A review of current state databases, including the listing of underground storage tanks (USTs), Leaking Underground Storage Tanks (LUSTs), solid waste facilities (SWFs), Voluntary Cleanup Program (VCP) sites, Confirmed and Suspected Contaminated Sites (CSCSs), and other ASTM standard databases.
- A review of US Geological Survey (USGS) topographic maps to identify the physiographic setting of the Property.
- A reconnaissance of the Property and surrounding area to evaluate the current operations and look for visual and/or olfactory evidence of contamination, such as stained soil, unusual odors, distressed vegetation, pipes, drums, oil sheens and/or discolored water, and improper manufacturing or waste disposal practices.
- An interview with Spencer Holcomb, Development Associate with Avenue 55, LLC (User representative). An inquiry was also made with the City of Redmond for information that it may have regarding the Property.
- The preparation of this report.

#### 1.3 LIMITATIONS OF REPORT

This Phase I ESA report is for the exclusive use of Avenue 55, LLC. The purpose of this report is to provide the client with an assessment of the potential for the presence of contamination on the Property. Phase I ESAs are non-comprehensive and may not identify all environmental risk associated with the Property. This study did not include an investigation for the presence of asbestos-containing materials, lead-based paint, radon gas, electro-magnetic fields from high-voltage power transmission lines, wetlands, endangered species, floodplains, vapor intrusion, or other issues not described in the aforementioned scope of work or within the ASTM Standard E1527-13 guidance document.

Within the limitations of scope, schedule, and budget, SoundEarth's services have been executed in general accordance with procedures specified in ASTM E1527-13. Because the SoundEarth report is based upon readily available and reasonably ascertainable information, the accuracy of which was not verified, SoundEarth cannot and does not guarantee that the Property is free of hazardous or potentially hazardous materials or conditions, or that latent or undiscovered conditions will not become evident in the future. Since Property activities beyond the control of SoundEarth could change at any time after the completion of this assessment, the observations, findings, and opinions can only be considered valid as of the date hereof. This report should not be relied upon after 180 days from the date it was issued.

#### 2.0 PROPERTY DESCRIPTION

The following subsections provide a summary of the location, legal description, and current use of the Property, as well as a discussion of surrounding land use.

## 2.1 LOCATION AND LEGAL DESCRIPTION

The Property is located at 6900 188th Avenue Northeast in Redmond, Washington, approximately 1.3 miles east of downtown Redmond, Washington, as shown in Figure 1. Figure 2 depicts a plan view/layout of the Property. The Property consists of an irregularly shaped tax parcel (King County Parcel No. 128630-0012) that covers approximately 254,687 square feet (5.85 acres) of land in Township 25 North/Range 6 East/Section 25. According to the King County iMap application, the Property is located at an approximate elevation of 115 to 120 feet above mean sea level. The highest elevations are on the northeastern portion of the Property.

The legal description of the Property is provided in Appendix A, Current and Archived County Assessor Records.

## 2.2 STRUCTURES AND IMPROVEMENTS

The Property is currently undeveloped except for a few temporary structures and storage containers. Photographs taken during the Property reconnaissance are included as attachments to this report.

Puget Sound Energy provides electricity to the Property. Potable water and sewer service, natural gas, and solid waste disposal and recycling services are not currently provided to the Property. No evidence of potable or process water supply wells was found on the Property.

## 2.3 CURRENT PROPERTY ZONING AND USE

According to the City of Redmond, the Property is zoned Neighborhood Commercial and Northeast Design District, which is used for commercial and residential purposes. The Property is currently vacant except for a few temporary structures and storage containers.

## 2.4 ADJOINING PROPERTIES

Development in the vicinity of the Property is a mix of industrial and commercial uses. Uses of adjoining properties at the time of the SoundEarth Property reconnaissance are summarized below and shown on Figure 2.

- North. A gravel pit operated by Cadman Gravel Company is located north of the Property.
- East. A portion of a gravel pit operated by Cadman Gravel Company is located east of the Property.
- South. Southeast Redmond Park is located south of the Property.
- West. A FedEx Distribution Center and a corporate park are located across 188th Avenue Northeast to the west of the Property.

## 2.5 GEOLOGIC CONDITIONS

Geologic conditions often influence the environmental conditions of a property. Underlying soil types and bedrock formations may facilitate or impede the migration of chemical contaminants in groundwater or soil vapor and may be a source of contaminants such as radon and metals. This section of the report summarizes known geologic factors and conditions that may impact the Property with regard to environmental concerns.

## 2.5.1 Geology

The Washington Interactive Geologic Map indicates the Property is underlain by Fraser age continental glacial drift. These deposits consist of a dense mixture of silt, sand, gravel, and clay that are typically characterized by relatively low vertical hydraulic conductivity.

Review of the Washington State Department of Ecology (Ecology) Well Log Database indicated that soil in the vicinity of the Property consists of silt and gravel. During a 2021 limited subsurface investigation at the Property, SoundEarth observed soil conditions that generally consisted of fill material including well-graded gravel with sand, clayey or silty sand with gravel, and poorly graded sand with gravel to depths of approximately 3 to 5 feet below ground surface bgs).

## 2.5.2 Hydrologic and Hydrogeologic Environment

Both the King County iMap application and the USGS Topographic Map of the Redmond, Washington Quadrangle, published in 2014, depict the topography in the vicinity of the Property as sloping downward to the south. The topographic map depicts the closest surface water body as Evans Creek, which is located approximately 0.4 miles to the east.

Based solely upon inference from local topography, drainage patterns, and surface water flow, it appears that shallow-seated groundwater in the vicinity of the Property flows in a general south-southeasterly direction. Based on this inferred groundwater flow direction, potential off-Property sources of chemical contamination that might adversely affect the Property would, therefore, most likely be located to the north-northwest in an inferred upgradient hydrologic position relative to the Property.

Review of a Groundwater Monitoring Report completed by Arcadis in 2003 for a property located approximately 0.3 miles west of the Property, indicated that groundwater in the vicinity of the Property has been encountered at a depth of approximately 21 to 28 feet bgs and flows in a general southerly direction.

## 2.6 SUMMARY

The presence of fill material at the Property is considered a potential issue of environmental concern and is discussed further in Section 9.0.

## 3.0 USER-PROVIDED INFORMATION

The following subsections summarize the information provided by the User of this Phase I ESA.

## 3.1 TITLE RECORDS

A title report was provided by the client to SoundEarth for review prior to production of this report. These documents may provide information about the Property, including ownership and other interests in the land, easement, and liens. Not all liens, defects, and encumbrances affecting title to the land may be included in the title report.

The Chicago Title Company of Washington document dated May 19, 2021, did not indicate the presence of liens, defects, encumbrances, or any other potential issues of environmental concern associated with the Property. A copy of this report is included in Appendix A.

## 3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

According to an interview with the User (Spencer Holcomb, Development Associate with Avenue 55, LLC), and the title documents reviewed for the Property, there are no environmental liens encumbering the Property or current limitations on either activity or use of the Property.

## 3.3 SPECIALIZED KNOWLEDGE

No specialized knowledge regarding the Property was provided by Avenue 55, LLC.

## 3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No Property valuation reduction relating to environmental concerns was reported by Avenue 55, LLC.

## 3.5 OBVIOUS OR COMMONLY KNOWN PROPERTY INFORMATION

Avenue 55, LLC was unaware of environmental concerns regarding the Property beyond what is presented in the prior reports, which are summarized in Section 3.8.

## 3.6 CURRENT OWNER, PROPERTY MANAGER, AND OCCUPANT

King County Assessor records lists the owner of the Property as Taylor Union Hill LLC. The Property is currently vacant and undeveloped with the exception of an office trailer and two sheds.

## 3.7 REASON FOR PERFORMING PHASE I

SoundEarth prepared this Phase I ESA at the request of Avenue 55, LLC prior to their planned redevelopment of the Property.

## 3.8 PREVIOUS ENVIRONMENTAL REPORTS

Avenue 55, LLC provided SoundEarth with copies of prior environmental reports, which are summarized below.

## 3.8.1 Washington State Department of Ecology No Further Action Letter

Ecology issued the north-adjoining property a determination of no further action on November 14, 2011. The letter indicated that a cleanup was conducted at the site following a release of diesel and waste oil to soil from a leaking underground storage tank (UST). Ecology had been notified of this release in 1998. Groundwater was reportedly not impacted, and the letter indicated that the site had met Washington State Model Toxics Control Act (MTCA) Method A Cleanup Levels.

## 3.8.2 SoundEarth Phase I ESA

SoundEarth completed a Phase I ESA of the Property in 2020. This prior Phase I ESA identified the following REC for the Property:

The potential presence of fill material beneath the Property.

## 3.8.3 SoundEarth Limited Subsurface Soil Investigation

In 2021, SoundEarth completed a limited subsurface soil investigation on the Property. A summary of the investigation is presented below.

- Test Pits and Sampling. On May 5, 2021, seven shallow test pits (TP01 through TP07) were excavated on the Property to depths of 3 to 5 feet bgs. On June 4, 2021, three additional test pits (TP08 through TP10) were completed at the Property to depths of 3 to 5 feet bgs. Test pit locations were selected based on areas that are likely to be graded during planned redevelopment activities and are shown on the attached Figure 2.
- Soil Conditions. SoundEarth noted that soil conditions generally consisted of fill material including well-graded gravel with sand, clayey or silty sand with gravel, and poorly graded sand with gravel. No obvious visual or olfactory indications of soil contamination, including odors, sheens, or staining, were observed at the time. Groundwater was not observed during the investigation except for in test pit TP02 at approximately 2.5 feet bgs.
- Soil Results. Selected soil samples were submitted for analysis of diesel-range petroleum hydrocarbons (DRPH), gasoline-range petroleum hydrocarbons (GRPH), oil-range petroleum hydrocarbons (ORPH), benzene, toluene, ethylbenzene, and total xylenes (BTEX), carcinogenic polycyclic aromatic hydrocarbons (cPAHs), and Resource Conservation and Recovery Act (RCRA) 8 metals. GRPH and ORPH were detected at concentrations below the applicable MTCA Method A cleanup levels in test pit TP01 at approximately 5 feet bgs. DRPH, ORPH, GRPH, and BTEX were not detected above laboratory reporting limits in any of the additional samples submitted for analysis. Metals were detected in all samples, but at concentrations typical of background levels. The cPAH, benzo(a)pyrene, was detected at concentrations above the applicable MTCA Method A cleanup level in soil samples collected from test pits TP07 and TP10 at approximately 1 foot bgs. TP07 and TP10 were located on the eastern portion of the Property. The concentration of benzo(a)pyrene in a soil sample collected from a depth of approximately 3 feet bgs was below the applicable MTCA cleanup level; however, the full lateral and vertical extent of impacts in fill material beneath the Property remains undefined.

## 3.9 SUMMARY

The presence of fill material and the confirmed impacts to soil at the Property are considered potential issues of environmental concern and are discussed further in Section 9.0.

## 4.0 HISTORICAL REVIEW

The history of land use for the Property and surrounding areas was evaluated to identify past uses that might have had adverse effects on the environmental conditions, primarily through the use of potentially hazardous materials. The following history of the Property and surrounding parcels is based on a compilation of information obtained from the following resources:

- King County Assessment records
- City of Redmond building permit files
- Heiden's and Polk city directories
- Aerial photographs

Selected copies of the information sources described above are included in the Photographs and Appendix A of this report.

## 4.1 HISTORICAL USE OF THE PROPERTY

The chronological development and historical use of the Property is described below.

Date(s)	Source	Description	Potential Issues of Environmental Concern
1885–1943	Topographic Maps, Aerial Photographs	The Property appears vacant and undeveloped.	None
1965–1969	Aerial Photographs	A road appears to have been constructed on the eastern portion of the Property and the western portion of the Property appears to have been cleared for agricultural purposes.	None
1977	Aerial Photographs	The Property no longer appears to be used for agricultural purposes. Most of the trees appear to have been cleared from the eastern portion of the Property and at least one road appears to be located in the central portion of the Property.	None
1980–1985	Aerial Photographs	The Property appears to be vacant and undeveloped, with the exception of a road on the eastern portion of the Property.  By at least 1985, the majority of the Property appears to have been reforested.	None
1990	Aerial Photograph	The Property appears to have been cleared and a road is located on the eastern portion of the Property. The Property appears to be part of a larger gravel mining operation.	The potential presence of fill material.
1998–2001	Aerial Photographs, Building Plans and Permits	The Property is vacant and undeveloped between at least 1998 and 2007.  The Property was occupied by Cadman Gravel Co. in at least 2001.	The potential presence of fill material.
2009–2019	Aerial Photographs	The eastern portion of the Property appears to be occupied by a mobile building and gravel parking lot. A storage yard located on the central portion of the Property increases in size between 2013 and 2017.	None

Aerial photographs suggest that the Property was historically part of a gravel mine operation and that fill material was added to the Property to bring it to its current grade. The source(s) of the fill material is unknown. The presence of fill material is considered a potential issue of environmental concern and is discussed further in Section 9.0.

## 4.2 HISTORICAL USE OF ADJOINING PROPERTIES

This section describes the findings of SoundEarth's research into the historical usage of the adjoining properties which are shown on Figure 2.

## 4.2.1 North-Adjoining Property

The northern portion of the north-adjoining property located at 18816 Northeast 80th Street appears to have been used for its current use of gravel mining since at least 1965. The southern portion of the property appears to also have been used for gravel mining since at least the 1980s. According to site maps on file with Ecology, the portion of the gravel mine closest to the Property has been used as a concrete and asphalt recycling yard.

## 4.2.2 <u>East-Adjoining Property</u>

At least two buildings appear to have been located on the eastern portion of the east-adjoining property (King County Parcel No. 072506-9033) by at least 1950. The western portion of the property appears to have remained vacant and undeveloped until at least 1985. By at least 1990, the two buildings appear to have been demolished and the property was used for its current use of gravel mining. According to site maps on file with Ecology, the east-adjoining property has been used as a contractor yard and stockpile area.

## 4.2.3 South-Adjoining Property

The south-adjoining property (King County Parcel No. 951091-0650) appears to have remained vacant and undeveloped through at least 1969. By at least 1977, a road appears to have been located on the central portion of the property and by at least 1985, this road appears to have been overgrown. By at least 1990, the property appears to have been used for gravel mining. However, the property appears to have been vacant by at least 2000 and was redeveloped with the existing public park by at least 2005.

## 4.2.4 West-Adjoining Property

By at least 1965, the southeastern portion of the west-adjoining property was used for agricultural purposes. However, by at least 1980, it appears that the agricultural fields were removed and the northern portion of the property was used for gravel mining. By 1990, it appears that the entire property was used for gravel mining. By 2000, the property appears to have been used for parking. In 2013, the property was redeveloped with the existing warehouse building (18795 Northeast 73rd Street). FedEx has occupied the property since 2014.

The southwest-adjoining property was vacant and undeveloped through 1985. The property was cleared of vegetation by 1990. The existing Cardinal Corporate Park C building (18750 Northeast 65th Street) was constructed on the property in 1997.

## 4.3 HISTORICAL USE OF SURROUNDING PROPERTIES

The surrounding properties appear to have remained undeveloped through the 1940s. By the mid-1960s, the area appears to be largely used for industrial activities such as gravel mining. In the early 2000s,

properties to the south appear to have transitioned to being primarily used for residential purposes and the properties to the east transitioned to being primarily used for commercial purposes.

## 4.4 SUMMARY

The presence of fill material is considered a potential issue of environmental concern and is discussed further in Section 9.0.

## 5.0 REGULATORY REVIEW

A review of regulatory agency records was conducted to identify known or potential sources of contamination that could adversely impact the Property. Records were obtained using the commercial database search services of Environmental Data Resources, Inc. (EDR), which queries EPA, state regulatory agency, and other similar databases within the approximate minimum search distances specified in ASTM E1527-13. The commercial database search report was reviewed for accuracy of property locations and was modified appropriately. Orphan sites (sites that EDR was unable to map) were also reviewed in an effort to evaluate whether any of those sites were also located within the respective search distance No orphan sires were reported by EDR. The complete EDR report is included as Appendix B and contains figures showing the locations of the reportable sites within the search distance for each database queried. The databases searched, the corresponding search distance, and the number of sites found within the search distance for each database are summarized in the following table.

			Sites within Search			
Source of Regulatory Information	Acronym	Search Distance	Distance			
	Federal Databases					
National Priorities List	NPL	1.0 mile	0			
National Priorities List Deletions	Delisted NPL	1.0 mile	0			
Superfund Enterprise Management System;	SEMS and	0.5 miles	0			
also SEMS Archive	SEMS-ARCHIVE	0.5 miles	0			
EPA-Listed Brownfields	Brownfields	0.5 miles	0

System/National Response Center	ERNS/NRC	Property only	0			
	State Databases					
Confirmed and Suspected Contaminated						
Sites List	CSCSL	1.0 mile	8			
Confirmed and Suspected Contaminated						
Sites List – No Further Action	CSCSL NFA	0.5 miles	7			
Solid Waste Facilities/Landfill Sites	SWF/LF	0.5 miles	0			
Leaking Underground Storage Tanks	LUST	0.5 miles	1			
		Property and adjoining				
Registered Underground Storage Tanks	UST	parcels only	0			
State-listed Brownfields	Brownfields	0.5 miles	0			
Voluntary Cleanup Program	VCP	0.5 miles	5			
Independent Cleanup Reports	ICR	0.5 miles	2			
Engineering and Institutional Controls	ENG/INST CONTROL	Property only	0			

The Property was not listed on any of the databases described above.

According to the EDR report, 25 other sites within the applicable search distances appeared on at least one of the ASTM Standard databases listed above. However, most of these regulated sites are not considered to represent a potential issue of environmental concern for the Property for the following reasons:

- Ten sites are listed only as having been a RCRA notifier and are located at least 0.1 miles from the Property.
- Seven sites are listed on a database as having had a release to the environment, but are located over 0.25 miles away from the Property and have been reportedly cleaned up, issued a No Further Action determination, or involved soil impacts only.

Eight sites are listed on a database as having had a release to the environment where groundwater
was either confirmed or suspected to have been impacted; however, the sites are all located over
0.23 miles cross- or downgradient of the Property.

The one remaining site is discussed below:

FedEx Ground Distribution Center, located at 188th Avenue Northeast & Northeast 73rd Street on the west-adjoining property, is listed in the VCP, INST CONTROL, and CSCSL NFA databases. During a geotechnical investigation conducted in 2012, fill material at depths of up to 35 feet was encountered at the site. Two soil samples contained concentrations of ORPH above the MTCA Method A cleanup level. One soil sample contained concentrations of cPAHs above the MTCA Method A cleanup level. Groundwater collected from the site contained concentrations of arsenic above the MTCA Method A cleanup level. Approximately 357 tons of impacted soil was excavated and removed from the site in 2013. One of the confirmation soil samples contained a concentration of dibenzo(a,h)-anthracene above the MTCA Method A cleanup level. An environmental covenant was issued to the site indicating that cPAHs remain on site in soil and arsenic remains on site in the groundwater. Ecology issued a determination of No Further Action for the site in 2019. The determination letter indicates that storm and process water discharged to groundwater from the nearby Cadman gravel mine is causing the arsenic detections in groundwater. While it does not appear that any impacts from this site have migrated to the Property, similar conditions related to fill material and arsenic impacts to groundwater may exist at the Property.

While not listed in the EDR report, the Cadman Redmond gravel mine is located on the north and east-adjoining properties at 18816 Northeast 80th Street. The facility has had an active sand and gravel general permit since at least 1979. Ecology files indicate that process water and stormwater are directed into a water treatment system before being discharged directly to the ground at the site. According to a site map available on Ecology's website, storm and process water from the southern portion of the site (the portion adjacent to the Property) flows to the north into an impoundment basin on the central portion of the site. Several violations, including failure to report monitoring data and exceedance of discharge benchmarks, have been reported at the site since 1995. While there is no specific release associated with the gravel pit, records from the FedEx facility discussed above indicate that there is a regional arsenic release to groundwater related to the Cadman site.

The regulatory records reviewed during the production of this report were considered sufficient to provide an opinion on the risk of impacts to the Property.

Potential issues of environmental concerns related to vapor encroachment were not identified in SoundEarth's review of regulatory records.

## 6.0 PROPERTY RECONNAISSANCE

Mr. Travis Zandi, a SoundEarth Associate Scientist, visited the Property on December 22, 2021, to review conditions and land use practices on the Property and on adjoining and nearby properties. SoundEarth was unescorted during the Property reconnaissance. Interior access was not provided to an office trailer and a storage shed located on the Property. Considering the apparent use of these temporary structures, the lack of interior access is not expected to affect the findings and conclusions of this report. The purpose of the Property reconnaissance was to identify readily apparent indications of hazardous or potentially

hazardous substances or petroleum products that were historically or are currently used, generated, stored, or disposed of on the Property. Selected photographs taken during the Property reconnaissance are included as an attachment to this report.

## 6.1 GROUNDS AND BUILDINGS

The following sections provide a description of general conditions and features observed during the Property reconnaissance.

## **Interior Observations**

A prefabricated shed is located on the western portion of the Property. Four empty gasoline containers and a retail sized container of motor oil were observed inside the prefabricated shed. No spills or stains were observed in the vicinity of the containers.

A portable trailer that appeared to be occupied by offices is located on the southwestern portion of the Property. A small storage container that appeared to contain computer servers was located west of the trailer. A small truck trailer and a semi-trailer were located north of the prefabricated shed. Interior access was not provided to the trailer or the storage containers.

## **Exterior Observations**

The Property is primarily vacant and undeveloped except for a few temporary structures and storage containers. A gravel parking lot is located on the western portion of the Property. What appeared to be a petroleum sheen was observed in stormwater on the western portion of the parking lot. The source of the sheen was not apparent at the time of the Property reconnaissance. Several vehicles are parked on the northern portion of the Property. A small pile of gravel is located on the northwestern portion of the Property. The eastern portion of the Property is undeveloped and covered with light vegetation. Stormwater appears to be diverted into either the west-adjoining right-of-way or infiltrates directly into the unpaved ground.

Specific conditions that may or may not constitute potential issues of environmental concern to the Property are presented in the following table. Those conditions identified are further discussed below.

	Item Present				Issue of Potential Concern	
Item	Yes	No	Description (if present)	Yes	No	
Petroleum Products	x		Four empty gasoline containers and a retail-sized container of motor oil were observed inside the prefabricated shed. No spills or staining were observed in the vicinity of the containers.		x	
Hazardous Substances X None were observ		None were observed on the Property or adjoining properties.		Х		
Hazardous Waste		х	No hazardous wastes were observed to be generated, stored, or disposed of at the Property.		х	

Item Present					Issue of Potential Concern	
Item	Yes	No	Description (if present)	Yes	No	
Landfills, Dumps		Х	No landfills or dumps were observed on the Property or adjoining properties.		Х	
Burial Sites or Solid Waste Disposal		x	No evidence of burial sites was observed on the Property or adjoining properties. No solid waste is generated at the Property.		X	
Aboveground Storage Tanks (ASTs)		Х	None were observed on the Property or adjoining properties.		х	
Underground Storage Tanks		Χ	None were observed on the Property or adjoining properties.		Х	
Drums and Storage Areas		Х	None were observed on the Property or adjoining properties.		Х	
Potential PCB-Containing Equipment		x	None was observed on the Property. A vault was observed west of the Property, where a utility-owned transformer may be located.		x	
HVAC System and Fuel Source		х	The trailer appears to be heated by electric heaters.		х	
Drains, Sumps, Cisterns, or Cesspools		х	None were observed on the Property or adjoining properties.		х	
Pits, Ponds, or Lagoons		Х	None were observed on the Property or adjoining properties.		Х	
Pavement or Soil Stains	X		A sheen was observed on the western portion of the gravel parking lot. The source of the sheen was not apparent at the time of the Property reconnaissance.		X	
Stains or Corrosion on walls		Х	None were observed on the Property.		Х	
Stressed Vegetation		Х	None was observed on the Property or adjoining properties.		Х	
Possible Fill or Grading	X		The grade of the north- and east-adjoining properties are considerably higher than the Property, which suggests that the Property was graded and that fill material has been placed at and around the Property.	X		
Chemical/TPH/Swamp-Gas Odors		Х	None were observed on the Property or adjoining properties.		Х	
Stormwater or Surface Erosion		Х	Stormwater appears to be directed either into the adjoining right-of-way to the west or infiltrates into the unpaved ground.		Х	
Wells and Potable Water		Х	No wells were observed on the Property or adjoining properties.		Х	

## 6.1.1 <u>Discussion Regarding Property Observations</u>

The grade of the north- and east-adjoining properties are considerably higher than the Property, which suggests that fill material has been placed at the Property and adjoining properties.

## 6.2 ADJOINING PROPERTIES

No readily apparent environmental issues were noted on the adjoining properties. The apparent use of the adjoining properties was discussed in Section 2.4.

SoundEarth Strategies, Inc. December 28, 2021

## 6.3 SUMMARY

The only issue of potential environmental concern identified during the Property reconnaissance consisted of the presence of fill material on the Property. Additional discussion regarding this issue is provided in Section 9.0.

## 7.0 INTERVIEWS

Information gathered from interviews is summarized below and is included in the appropriate sections of this report.

## 7.1 INTERVIEW WITH SITE MANAGER/PROPERTY OWNER

The names of key site managers were not provided to SoundEarth by Avenue 55, LLC. Key site managers are contacted to obtain current and historical environment information concerning the Property.

## 7.2 INTERVIEW(S) WITH OTHERS

SoundEarth made an inquiry with the City of Redmond pertaining to information that it may have regarding USTs and hazardous materials at the Property. The City of Redmond indicated that they did not have any records pertaining to USTs or hazardous materials at the Property.

## 7.3 SUMMARY

No issues of potential environmental concern were identified during the interviews conducted during this investigation.

## 8.0 DATA GAPS

No data gaps were encountered in the performance of this Phase I ESA.

## 9.0 FINDINGS AND OPINIONS

The following issue of potential environmental concern was identified during SoundEarth's investigation:

The confirmed presence of contaminated fill material beneath the Property. Aerial photographs suggest that the Property was historically part of the gravel mine that currently operates on adjoining properties. Commonly, imported fill material is used to replace the gravel that has been excavated and removed from such mines. Up to 35 feet of fill material was encountered during redevelopment of the west-adjoining property; impacts related to that fill material included petroleum hydrocarbons and cPAHs in soil and arsenic in groundwater. SoundEarth completed ten test pits at the Property in May and June 2021. Fill material was encountered throughout the test pits to the maximum depth of 5 feet bgs explored during that investigation. GRPH and ORPH were detected at concentrations below the applicable MTCA Method A cleanup levels in a test pit located on the western portion of the Property at approximately 5 feet bgs. The cPAH benzo(a)pyrene was detected at concentrations exceeding the applicable MTCA Method A cleanup level at approximately 1 foot bgs in two test pits located on the eastern portion of the Property; the benzo(a)pyrene concentration in a soil sample collected from a depth of 3 feet bgs

in one of the test pits was below the applicable cleanup level. Considering these findings, the confirmed presence of contaminated fill material beneath the Property constitutes a REC.

## 10.0 CONCLUSIONS

SoundEarth performed a Phase I ESA, in conformance with the scope and limitations of ASTM Practice E1527-13, of the Redmond Flex property located at 6900 188th Avenue Northeast in Redmond, Washington (the Property). Any exceptions to, or deletions from, this practice are described in Section 12.0 of this report. This assessment has revealed no evidence of RECs in connection with the Property except for the following:

• The confirmed presence of contaminated fill material beneath the Property.

## 11.0 PREPARER'S CREDENTIALS

This Phase I ESA was researched and written by Ms. Caroline Dickey, a staff environmental geologist. Ms. Dickey holds a bachelor's degree in geology-environmental studies from Whitman College. Mr. Ryan Bixby, an environmental professional as defined in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR 312.10), reviewed and interpreted the information upon which this report is based. Mr. Bixby holds a bachelor's degree in geology and has been a professional environmental consultant for more than 20 years. During his career in the environmental field, he has completed more than 500 Phase I ESAs in Colorado, Washington, Oregon, and California and has directed the completion of hundreds more by corporate technical staff. In addition, Mr. Bixby has completed and managed more than 100 Phase II ESAs and has managed the remediation of more than 20 contaminated properties (Appendix C).

## 12.0 DEVIATIONS

No deviations from the scope of work were required by Property conditions.

## 13.0 ADDITIONAL SERVICES

No additional services beyond the scope of work described in Section 1.2 were requested by the client.

## 15.0 STATEMENT OF THE ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in 40 CFR 312.10. I have the specific qualifications based on education, training, and experience to assess a Property of the nature, history, and setting of the Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Ryan Bixby, LG

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

#### ALTA COMMITMENT FOR TITLE INSURANCE

Issued By agent:

Commitment Number:

194740-SC Update 4th Commitment

#### **NOTICE**

**IMPORTANT - READ CAREFULLY**: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

#### **COMMITMENT TO ISSUE POLICY**

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Chicago Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

	Chicago Title Insurance Company By:	
	Winz	
	Randy Quirk, President	
Countersigned By:	Attest:

#### **Legal Description**

Lot 7 of City of	Redmond Short F	Plat No. L080452	(also known as Union	Hill Corporate Center Short Plat)
recorded under	recording number	er 201209069000	04, in King County, W	ashington.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

#### Copyright American Land Title Association. All rights reserved.

#### SCHEDULE B, PART I REQUIREMENTS

All of the following Requirements must be met:

- 1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- 2. Pay the agreed amount for the estate or interest to be insured.
- 3. Pay the premiums, fees, and charges for the Policy to the Company.
- 4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- 5. Additional requirements and/or exceptions may be added as details of the transaction are disclosed to, or become known by the Company.
- 6. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below.

Limited Liability Company: Taylor Union Hill, LLC

- A copy of its operating agreement, if any, and any and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.
- b. If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendment thereto with the appropriate filing stamps.
- c. If the Limited Liability Company is member-managed a full and complete current list of members certified by the appropriate manager or member.
- d. A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created
- e. If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

#### SCHEDULE B, PART I REQUIREMENTS

(continued)

7. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below.

Limited Liability Company: Magnussen-Cadman, L.L.C

- a. A copy of its operating agreement, if any, and any and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.
- b. If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendment thereto with the appropriate filing stamps.
- c. If the Limited Liability Company is member-managed a full and complete current list of members certified by the appropriate manager or member.
- d. A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created
- e. If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

- 8. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.
- 9. The Proposed Policy Amount(s) must be increased to the full value of the estate or interest being insured, and any additional premium must be paid at that time. An Owner's policy should reflect the purchase price or full value of the Land. A Loan Policy should reflect the loan amount or value of the property as collateral. Proposed Policy Amount(s) will be revised and premiums charged consistent therewith when the final amounts are approved.
- 10. For each policy to be issued as identified in Schedule A, Item 2; the Company shall not be liable under this commitment until it receives a designation for a Proposed Insured, acceptable to the Company. As provided in Commitment Condition 4, the Company may amend this commitment to add, among other things, additional exceptions or requirements after the designation of the Proposed Insured.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

#### Copyright American Land Title Association. All rights reserved.

#### SCHEDULE B, PART I REQUIREMENTS

(continued)

11. TO PROVIDE THE EXTENDED COVERAGE POLICY IDENTIFIED IN SCHEDULE A, GENERAL EXCEPTIONS A THROUGH D WILL BE CONSIDERED WHEN OUR INSPECTION AND/OR REVIEW OF SURVEY, IF REQUIRED, IS COMPLETED. A SUPPLEMENTAL COMMITMENT WILL FOLLOW.

If there have been recent improvements on the property within 90 days prior to closing we will require a signed indemnity agreement and a recent financial statement from each indemnitor.

If construction financing is to be insured, please contact the title officer for requirements.

The Company reserves the right to add additional exceptions or make further requirements after review of the property inspection and requested documentation.

12. The Company will require an ALTA/ACSM LAND TITLE SURVEY. If the owner of the Land the subject of this transaction is in possession of a current ALTA/ACSM LAND TITLE SURVEY, the Company will require that said survey be submitted for review and approval; otherwise, a new survey, satisfactory to the Company, must be prepared by a licensed land surveyor and supplied to the Company prior to the close of escrow.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

#### **END OF REQUIREMENTS**

#### **NOTES**

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: Notice: Please be aware that due to the conflict between federal and state laws concerning the

cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any

transaction involving Land that is associated with these activities.

Note B: Note: FOR INFORMATIONAL PURPOSES ONLY:

The following may be used as an abbreviated legal description on the documents to be recorded, per Amended RCW 65.04.045. Said abbreviated legal description is not a substitute for a complete legal description within the body of the document:

Lot: 7 City of Redmond Short Plat No. L080452

Tax Account No.: 128630-0012-03

Note C: Note: Any map furnished with this Commitment is for convenience in locating the land indicated herein

with reference to streets and other land. No liability is assumed by reason of reliance thereon.

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

#### **GENERAL EXCEPTIONS**

- A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.
- B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.
- C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.
- D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.
- E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.
- F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.
- G. Unpatented mining claims, and all rights relating thereto.
- H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.
- I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.
- J. Water rights, claims or title to water.
- K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

#### **COMMITMENT CONDITIONS**

#### 1. DEFINITIONS

- (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) "Title": The estate or interest described in Schedule A.
- 2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.
- 3. The Company's liability and obligation is limited by and this Commitment is not valid without:
  - (a) the Notice;
  - (b) the Commitment to Issue Policy;
  - (c) the Commitment Conditions;
  - (d) Schedule A;
  - (e) Schedule B, Part I-Requirements;
  - (f) Schedule B, Part II-Exceptions; and
  - (g) a counter-signature by the Company or its issuing agent that may be in electronic form.

#### 4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

#### 5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
  - (i) comply with the Schedule B, Part I-Requirements;
  - (ii) eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or
  - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
- (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.
- (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

#### Copyright American Land Title Association. All rights reserved.

(continued)

#### LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

#### 7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

#### 8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

#### **END OF CONDITIONS**

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

#### Copyright American Land Title Association. All rights reserved.

#### RECORDING REQUIREMENTS

Effective January 1, 1997, document format and content requirements have been imposed by Washington Law. Failure to comply with the following requirements may result in rejection of the document by the county recorder or imposition of a \$50.00 surcharge.

#### First page or cover sheet:

3" top margin containing nothing except the return address.

1" side and bottom margins containing no markings or seals.

Title(s) of documents.

Recording no. of any assigned, released or referenced document(s).

Grantors names (and page no. where additional names can be found).

Grantees names (and page no. where additional names can be found).

Abbreviated legal description (Lot, Block, Plat Name or Section, Township, Range and Quarter, Quarter Section for unplatted). Said abbreviated legal description is not a substitute for a complete legal description which must also appear in the body of the document.

Assessor's tax parcel number(s).

Return address (in top 3" margin).

**A cover sheet can be attached containing the above format and data if the first page does not contain all required data.

#### Additional Pages:

1" top, side and bottom margins containing no markings or seals.

#### All Pages:

No stapled or taped attachments. Each attachment must be a separate page. All notary and other pressure seals must be smudged for visibility. Font size of 8 points or larger.

Recording Requirements COMD1138.doc / Updated: 12.16.20

Printed: 05.19.21 @ 01:21 PM by TZ WA-CT-FBCM-02150.620761-194740-SC

#### **WIRE FRAUD ALERT**

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- ALWAYS VERIFY wire instructions, specifically the ABA routing number and account number, by calling the
  party who sent the instructions to you. DO NOT use the phone number provided in the email containing the
  instructions, use phone numbers you have called before or can otherwise verify. Obtain the number of
  relevant parties to the transaction as soon as an escrow account is opened. DO NOT send an email to
  verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- USE COMPLEX EMAIL PASSWORDS that employ a combination of mixed case, numbers, and symbols.
   Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

### FIDELITY NATIONAL FINANCIAL PRIVACY NOTICE

#### Effective April 9, 2020

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

#### **Collection of Personal Information**

FNF may collect the following categories of Personal Information:

- contact information (e.g., name, address, phone number, email address);
- demographic information (e.g., date of birth, gender, marital status);
- identity information (e.g. Social Security Number, driver's license, passport, or other government ID number);
- financial account information (e.g. loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

#### **Collection of Browsing Information**

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

#### **Other Online Specifics**

<u>Cookies</u>. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

<u>Web Beacons</u>. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

<u>Do Not Track</u>. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

<u>Links to Other Sites</u>. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

#### **Use of Personal Information**

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

#### When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We may share your Personal Information with affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

#### **Security of Your Information**

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

#### **Choices With Your Information**

If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request by email, phone, or physical mail as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

<u>For California Residents</u>: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (<a href="https://fnf.com/pages/californiaprivacy.aspx">https://fnf.com/pages/californiaprivacy.aspx</a>) or call (888) 413-1748.

<u>For Nevada Residents</u>: You may be placed on our internal Do Not Call List by calling (888) 934-3354 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.

<u>For Oregon Residents</u>: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

<u>For Vermont Residents</u>: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

#### **Information From Children**

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

#### **International Users**

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

#### **FNF Website Services for Mortgage Loans**

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

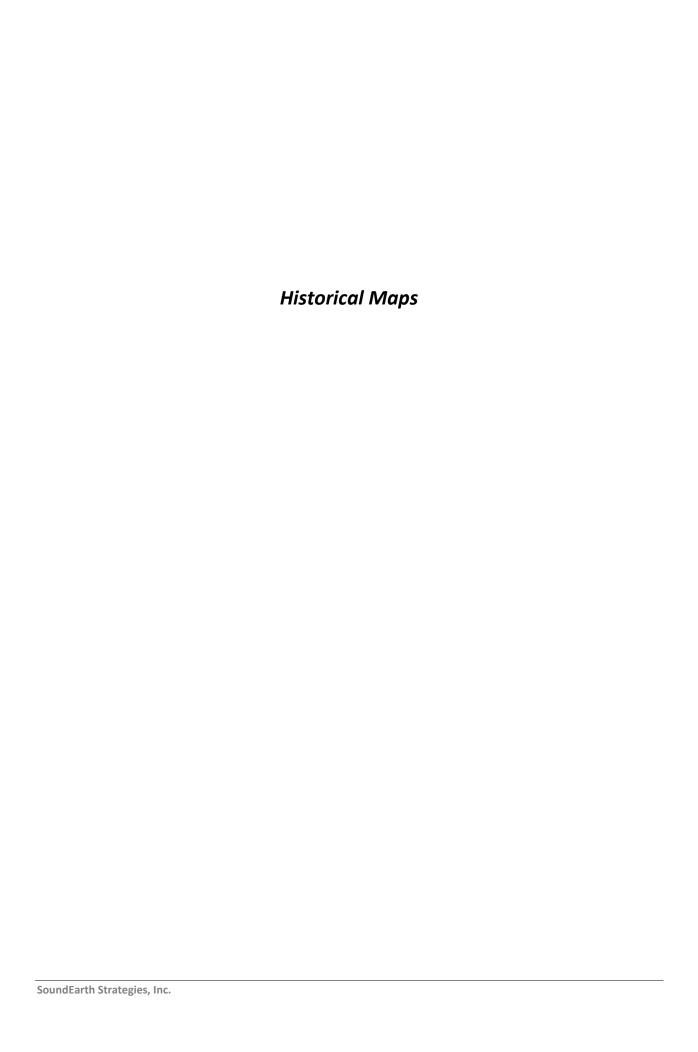

#### Your Consent To This Privacy Notice; Notice Changes; Use of Comments or Feedback

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice. We may use comments or feedback that you submit to us in any manner without notice or compensation to you.

#### Accessing and Correcting Information; Contact Us

If you have questions, would like to correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, send your requests to privacy@fnf.com, by phone to (888) 934-3354, or by mail to:

## Phase I Environmental Site Assessment User Questionnaire

User Name:	Lucy TS. LLC		
User Phone Number:	266-7,7.9696	Date:	10.29-2020

#### Introduction

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"). the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

No

2. Are you aware of any activity and land-use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Vo

3. As the user of this ESA do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

- 4. Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

  Yes
- **5.** Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,
  - (a.) Do you know the past uses of the property?

Contractor's yard

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

No

(c.) Do you know of spills or other chemical releases that have taken place at the property?

No

(d.) Do you know of any environmental cleanups that have taken place at the property?

No

**6.** As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

No

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
TEREX WASHINGTON INC	18700 NE 65TH ST	SW 1/8 - 1/4 (0.238 mi.)	E13	45

#### Lists of state- and tribal (Superfund) equivalent sites

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 08/25/2021 has revealed that there is 1 HSL site within approximately 1 mile of the target property.

#### Lists of state- and tribal hazardous waste facilities

Facility Status: Cleanup Started

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/12/2021 has revealed that there are 8 CSCSL sites within approximately 1 mile of the target property.

#### Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/12/2021 has revealed that there are 7 CSCSL NFA sites within approximately 0.5 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Financial Assurance: A listing of financial assurance information for underground storage tank facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

A review of the Financial Assurance list, as provided by EDR, has revealed that there is 1 Financial Assurance site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D00

Waste Description: IGNITABLE WASTE

Waste Code: D002

Waste Description: CORROSIVE WASTE

Waste Code: D003

Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D018
Waste Description: BENZENE

Waste Code: D035

Waste Description: METHYL ETHYL KETONE

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

Direction Distance Elevation

Site Database(s) EPA ID Number

# TEREX WASHINGTON INC 65TH ST (Continued)

1001204026

**EDR ID Number** 

NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F035

Waste Description: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT

FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT

USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE

TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE

CREOSOTE AND/OR PENTACHLOROPHENOL.

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to guery and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

## STANDARD ENVIRONMENTAL RECORDS

### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 24 Next Scheduled EDR Contact: 01/10/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021 Date Data Arrived at EDR: 06/24/2021 Date Made Active in Reports: 09/20/2021

Next Scheduled EDR Contact: 01/10/2022 Data Release Frequency: Varies

## SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 01/24/2022 Data Release Frequency: Quarterly

### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

# Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021 Date Data Arrived at EDR: 09/15/2021 Date Made Active in Reports: 10/12/2021

Next Scheduled EDR Contact: 03/14/2022 Data Release Frequency: Semi-Annually

### Lists of state- and tribal hazardous waste facilities

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/12/2021 Date Data Arrived at EDR: 07/13/2021 Date Made Active in Reports: 10/04/2021

Number of Days to Update: 83

## Lists of state and tribal registered storage tanks

FEMA UST: Underground Storage Tank Listing

A listing of all FEMA owned underground storage tanks.

Date of Government Version: 01/29/2021 Date Data Arrived at EDR: 02/17/2021 Date Made Active in Reports: 03/22/2021

Number of Days to Update: 33

Source: FEMA

Telephone: 202-646-5797 Last EDR Contact: 11/01/2021

Next Scheduled EDR Contact: 01/17/2022 Data Release Frequency: Varies

UST: Underground Storage Tank Database

Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 08/09/2021 Date Data Arrived at EDR: 08/11/2021 Date Made Active in Reports: 11/05/2021

Number of Days to Update: 86

Source: Department of Ecology Telephone: 360-407-7183 Last EDR Contact: 11/11/2021

Next Scheduled EDR Contact: 02/21/2022 Data Release Frequency: Quarterly

AST: Aboveground Storage Tank Locations

A listing of aboveground storage tank locations regulated by the Department of Ecology's Spill Prevention, Preparedness and Response Program.

Date of Government Version: 12/14/2015 Date Data Arrived at EDR: 02/02/2016 Date Made Active in Reports: 05/03/2016

Number of Days to Update: 91

Source: Department of Ecology Telephone: 360-407-7562 Last EDR Contact: 10/25/2021

Next Scheduled EDR Contact: 02/07/2022 Data Release Frequency: Varies

INDIAN UST R9: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).

Date of Government Version: 05/27/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Source: EPA Region 9 Telephone: 415-972-3368 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022 Data Release Frequency: Varies

INDIAN UST R4: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations)

Date of Government Version: 05/28/2021 Date Data Arrived at EDR: 06/22/2021 Date Made Active in Reports: 09/20/2021

Number of Days to Update: 90

Source: EPA Region 4 Telephone: 404-562-9424 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022 Data Release Frequency: Varies

INDIAN UST R6: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 05/17/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Source: EPA Region 6 Telephone: 214-665-7591 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022 Data Release Frequency: Varies

INDIAN UST R7: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 06/01/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Source: EPA Region 7 Telephone: 913-551-7003 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022 Data Release Frequency: Varies

INDIAN UST R8: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

Date of Government Version: 05/27/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Data Release Frequency: Varies

INDIAN UST R1: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 1 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 04/28/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Source: EPA, Region 1 Telephone: 617-918-1313 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022

Data Release Frequency: Varies

INDIAN UST R10: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 10 (Alaska, Idaho, Oregon, Washington, and Tribal Nations).

Date of Government Version: 04/27/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Source: EPA Region 10 Telephone: 206-553-2857 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022

Data Release Frequency: Varies

INDIAN UST R5: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 04/06/2021 Date Data Arrived at EDR: 06/11/2021 Date Made Active in Reports: 09/07/2021

Number of Days to Update: 88

Source: EPA Region 5 Telephone: 312-886-6136 Last EDR Contact: 11/15/2021

Next Scheduled EDR Contact: 01/31/2022 Data Release Frequency: Varies

## State and tribal institutional control / engineering control registries

INST CONTROL: Institutional Control Site List Sites that have institutional controls.

Date of Government Version: 10/11/2021 Date Data Arrived at EDR: 10/12/2021 Date Made Active in Reports: 12/08/2021

Number of Days to Update: 57

Source: Department of Ecology Telephone: 360-407-7170 Last EDR Contact: 10/12/2021

Next Scheduled EDR Contact: 01/24/2022 Data Release Frequency: Quarterly

#### Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Program Sites

Sites that have entered either the Voluntary Cleanup Program or its predecessor Independent Remedial Action Program.

Date of Government Version: 07/12/2021 Date Data Arrived at EDR: 07/13/2021 Date Made Active in Reports: 10/06/2021

Number of Days to Update: 85

Source: Department of Ecology Telephone: 360-407-7200 Last EDR Contact: 10/12/2021

Next Scheduled EDR Contact: 01/24/2022

Data Release Frequency: Varies

ICR: Independent Cleanup Reports

These are remedial action reports Ecology has received from either the owner or operator of the sites. These actions have been conducted without department oversight or approval and are not under an order or decree. This database is no longer updated by the Department of Ecology.

Date of Government Version: 12/01/2002 Date Data Arrived at EDR: 01/03/2003 Date Made Active in Reports: 01/22/2003

Number of Days to Update: 19

Source: Department of Ecology Telephone: 360-407-7200 Last EDR Contact: 08/10/2009

Next Scheduled EDR Contact: 11/09/2009 Data Release Frequency: No Update Planned

INDIAN VCP R7: Voluntary Cleanup Priority Lisitng

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008 Date Data Arrived at EDR: 04/22/2008 Date Made Active in Reports: 05/19/2008

Number of Days to Update: 27

Source: EPA, Region 7 Telephone: 913-551-7365 Last EDR Contact: 07/08/2021

Next Scheduled EDR Contact: 07/20/2009

Data Release Frequency: Varies

INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015 Date Data Arrived at EDR: 09/29/2015 Date Made Active in Reports: 02/18/2016

Number of Days to Update: 142

Source: EPA, Region 1 Telephone: 617-918-1102 Last EDR Contact: 12/14/2021

Next Scheduled EDR Contact: 04/04/2022 Data Release Frequency: Varies

PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

Date of Government Version: 07/30/2021 Date Data Arrived at EDR: 07/30/2021 Date Made Active in Reports: 08/02/2021

Number of Days to Update: 3

Source: Department of Ecology Telephone: 360-407-0515 Last EDR Contact: 11/11/2021

Next Scheduled EDR Contact: 02/21/2022 Data Release Frequency: Varies

### Lists of state and tribal brownfield sites

**BROWNFIELDS: Brownfields Sites Listing** 

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 07/12/2021 Date Data Arrived at EDR: 07/13/2021 Date Made Active in Reports: 10/04/2021

Number of Days to Update: 83

Source: Department of Ecology Telephone: 360-725-4030 Last EDR Contact: 10/12/2021

Next Scheduled EDR Contact: 01/24/2022 Data Release Frequency: Quarterly

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/10/2021 Date Data Arrived at EDR: 06/10/2021 Date Made Active in Reports: 08/17/2021

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2021 Date Data Arrived at EDR: 05/18/2021 Date Made Active in Reports: 08/03/2021

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## TACOMA/PIERCE COUNTY:

LF TACOMA/PIERCE: Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Date of Government Version: 09/01/2002 Date Data Arrived at EDR: 03/24/2003 Date Made Active in Reports: 05/14/2003

Number of Days to Update: 51

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/23/2021 Date Data Arrived at EDR: 08/10/2021 Date Made Active in Reports: 11/08/2021

Number of Days to Update: 90

Source: Department of Energy & Environmental Protection

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

**Public Schools** 

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

**Private Schools** 

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

# **GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

REDMOND PROPERTY 6900 188TH AVENUE NORTHEAST REDMOND, WA 98052

### **TARGET PROPERTY COORDINATES**

Latitude (North): 47.66719 - 47[^] 40′ 1.88″ Longitude (West): 122.085875 - 122[^] 5′ 9.15″

Universal Tranverse Mercator: Zone 10 UTM X (Meters): 568628.9 UTM Y (Meters): 5279497.0

Elevation: 117 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map: 14820824 REDMOND, WA

Version Date: 2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

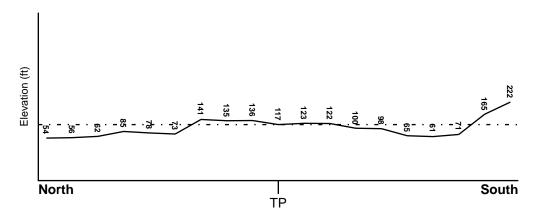

### **TOPOGRAPHIC INFORMATION**

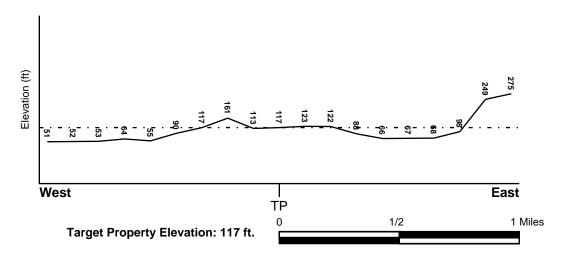

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

Flood Plain Panel at Target Property FEMA Source Type

53033C0390F FEMA Q3 Flood data

Additional Panels in search area: FEMA Source Type

Not Reported

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

REDMOND YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Everett

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## Soil Map ID: 4

Soil Component Name: Everett

Soil Surface Texture: gravelly sandy loam

Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels. Hydrologic Group:

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## Soil Map ID: 5

Soil Component Name: Water

Soil Surface Texture: gravelly sandy loam

Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels. Hydrologic Group:

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

### **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# Key Strengths

- Specializes in management of environmental projects with tight schedules, budgets, and permit constraints.
- Experience managing projects that involve regulatory considerations.
- Over 40 years living and working in the Puget Sound Region, familiar with local regulatory and cultural considerations.
- Personally completed over 500 Phase I ESAs and performed senior review of more than 1,000 Phase I ESAs completed by other staff.
- Managed multiple large petroleum programs consisting of dozens of sites and multiple former bulk fuel facilities.
- Oversaw implementation of petroleum remediation systems of various types.
- Conducted numerous Phase II subsurface soil and groundwater investigations on all types of properties.

# RYAN BIXBY, LG

# **Managing Principal**

Ryan has over 20 years of experience working on complex environmental projects. Ryan is a registered professional geologist specializing in due diligence and solutions for a variety of environmental problems. He has completed hundreds of Phase I and Phase II Environmental Site Assessments (ESAs), including more than 500 Phase I ESAs alone. Ryan has managed the evaluation of contamination sources and the extent of contamination associated with current and historical land uses on numerous remediation projects. He has worked closely with local, state, regulatory agencies to receive site closure and No Further Actions through the Voluntary Cleanup Program and Ecology's formal programs. In addition, Ryan has provided litigation support to assign and direct cost recovery efforts for clients under the Washington State Model Toxics Control Act.

# **Sample of Relevant Experience**

**Sound Transit, On-call Environmental Services, King and Snohomish Counties, WA. Principal in Charge**(2016-Present). Ryan is currently serving as the Principal in
Charge and is providing overall contract oversight for this fiveyear on-call contract, including QA/QC of SoundEarth tasks.
Under this contract, SoundEarth is responsible for providing
Phase I ESAs and pre-demolition Hazardous Building Material
Surveys. Other services provided by SoundEarth include field
support for sediment sampling. SoundEarth has completed
dozens of Phase I ESAs for residential properties within the
Lynnwood Link Extension alignment to facilitate Sound Transit's
purchase of those properties. SoundEarth's depth of staff
resources and ability to respond quickly allowed us to complete
the initial 19 Phase I ESAs in 30 business days. SoundEarth
subsequently performed hazmat surveys on dozens of properties

to allow Sound Transit to prepare accurate budgets for the eventual demolition and redevelopment of the properties.

Port of Tacoma, On-call SEPA, NEPA, and Environmental Permitting Services, Tacoma, WA.

Principal in Charge (2017-Present). Ryan is currently serving as the Principal in Charge and is providing overall contract oversight for this two-year on-call contract to provide services for the Port. SoundEarth's service directives under this contract have included SEPA Strategy for the General Central Peninsula Improvement Program.

Port of Seattle, On-call Environmental Review and Permitting IDIQ, Seattle, WA. Principal in Charge (2017-Present). Ryan is currently serving as the Principal in Charge and is providing overall contract oversight for this five-year on-call contract to provide services for both the Maritime and Aviation divisions of the Port. SoundEarth's service directives under this contract have included SEPA and permit strategy, preparation of SEPA documents, and preparation of in-water and land use permits.

City of Seattle, Finance and Administrative Services On-Call Environmental Services, Seattle, WA. Principal in Charge (2013-Present). Ryan is currently serving as the Principal in Charge and is providing overall contract oversight for this five-year on-call contract. Ryan also served as Project Manager on various individual tasks where he was responsible for conducting subsurface investigations, remedial investigations, and cleanup action planning at numerous City of Seattle properties. As Project Manager, Ryan coordinated all tasks associated with the investigations, including scope of work development, management of field staff, data interpretation, reporting, client communication, and regulatory documentation.

City of Seattle, Seattle City Light On-Call Environmental Support Services, Seattle, WA. Principal in Charge (2016-Present). Ryan is currently serving as the Principal in Charge and is providing overall contract oversight for this three-year on-call contract. Seattle City Light has contracted with SoundEarth to provide on-call environmental field investigations and analyses, contaminated site evaluation/cleanup oversight, and environmental permitting on an on-call basis. Tasks have included near-surface soil sampling, subsurface Remedial Investigations, and Certified Erosion & Sediment Control (CESCL) inspections. To date, SoundEarth has conducted near-surface soil sampling at five Seattle City Light properties.

City of Seattle Department of Parks and Recreation, On-Call Environmental Services, Seattle, WA. Principal in Charge (2003-2015). Managed the due diligence program between 2005 and 2008 before taking over the Principal review responsibilities in 2008. Provided reporting and guidance for environmental due diligence associated with potential property acquisitions by the City of Seattle Parks and Recreation Department (SPR). Participated in the development of over 50 Phase I ESAs and additional investigations and hazardous material surveys to aid in the purchase and rehabilitation of SPR properties into open space and other park facilities. SPR contracted with SoundEarth for over a decade to complete environmental investigation on more than 80 separate projects, including 70 Phase I ESAs and numerous Phase II ESAs. Project tasks included Remedial Design, remedial system design review, engineering cost estimating, UST assessment and decommissioning, sediment assessments; risk assessment including hazardous building material surveys, asbestos and lead-based paint surveys, and abatement oversight. Properties varied greatly in size and complexity and ranged from small, undeveloped parcels to large multi-parcel properties covering several acres with complicated land use histories. Key project elements have included Phase I and II ESAs, Remedial Investigations (RIs), Feasibility Studies (FSs), Cleanup Action Plan,

Remedial Design, Remedial Action, Monitoring, Site Hazard Risk Assessment, Public Involvement Support, Sediment, UST Assessment and Decommissioning, and Vapor Intrusion.

Goodman Real Estate, Environmental Services on Various Projects, WA. Principal Review. Performed principal review of numerous Phase I ESAs for properties that were owned or being considered for purchase by Goodman Real Estate, including commercial, residential, and industrial properties. The client-imposed schedules frequently required that the due diligence efforts be completed in less than 2 weeks in order to allow the transaction to proceed.

January 7, 2022

Mr. Drew Zaborowski Avenue 55, LLC 600 University Street, Suite 2305 Seattle, Washington 98101

SUBJECT: **EXPOSURE PATHWAY EVALUATION REPORT** 

**Redmond Flex** 

6900 188th Avenue Northeast Redmond, Washington 98052 Project Number: 0970-017

Dear Mr. Zaborowski:

SoundEarth Strategies, Inc. (SoundEarth) has prepared this letter report to present the findings of the exposure pathway evaluation and risk quantification conducted for the Redmond Flex property located at 6900 188th Avenue Northeast in Redmond, Washington (the Property; Figure 1). This report includes the following:

- A summary of the known environmental conditions and soil sampling conducted to date at the Property.
- A summary of the remaining data gaps identified for the Property.
- An evaluation of exposure pathways and risks associated with the known and potential contamination at the Property.
- A summary of the feasible remedy that will be implemented to effectively mitigate the risks associated with the known and potential contamination at the Property.
- A quantification of the risk associated with remediation of the known and potentially contaminated soil at the Property.
- A summary of the proposed scope of work and estimated costs for a supplemental subsurface investigation to address the remaining data gaps at the Property.

#### **PROPERTY DESCRIPTION**

The Property consists of an irregular-shaped tax parcel (King County Parcel No. 128630-0012) that covers approximately 254,687 square feet (5.85 acres) of land. The Property is currently undeveloped. Several temporary structures and storage containers are present on the Property, including a mobile office trailer, sheds, dumpsters, truck trailers and semitrailers, and heavy equipment. Adjoining properties include gravel pits and associated areas operated by Cadman Inc to the north and east, Southeast Redmond Park to the south, and a FedEx Ground Distribution Center beyond the 188th Avenue Northeast right-of-way to the west. Land uses on surrounding properties include commercial, recreational, and mining.

The Property is planned to be redeveloped with one slab-on-grade building and an associated parking lot, access road, and stormwater vault. Construction of the building would require excavation to a maximum depth of 9 feet below ground surface (bgs) in the area of a proposed stormwater vault on the northwestern portion of the Property. It is anticipated that grading and excavation on the remainder of the Property would be conducted to a depth of less than 2 feet bgs.

#### SUMMARY OF PREVIOUS INVESTIGATIONS AND KNOWN ENVIRONMENTAL CONDITIONS

SoundEarth previously conducted two Phase I Environmental Site Assessments (ESAs) in November 2020 and December 2021 and a limited subsurface investigation in May and June 2021. These investigations are summarized in the following sections.

#### Phase I ESAs (November 2020 and December 2021)

SoundEarth conducted two Phase I ESAs at the Property; the respective reports are dated November 16, 2020, and December 28, 2021. The Phase I ESAs identified the following recognized environmental condition:

The confirmed presence of contaminated fill material beneath the Property. Aerial photographs suggest that the Property was historically part of the gravel mine that currently operates on adjoining properties. Commonly, imported fill material is used to replace the gravel that has been excavated and removed from such mines. Up to 35 feet of fill material was encountered during redevelopment of the west-adjoining property. Impacts related to that fill material included petroleum hydrocarbons and carcinogenic polycyclic aromatic hydrocarbons (cPAHs) in soil and arsenic in groundwater. The arsenic-impacted groundwater was reportedly a result of storm and process water discharged to groundwater from the nearby Cadman Inc gravel mine.

# Limited Subsurface Soil Investigation (May and June 2021)

SoundEarth conducted a limited subsurface soil investigation to evaluate the nature of the fill material at the Property in May and June 2021. This investigation included the advancement of 10 test pits to depths of 3 to 5 feet bgs in the locations shown on Figure 2. Test pit locations were selected based on areas that are likely to be graded during planned redevelopment activities.

Gasoline- and oil-range petroleum hydrocarbons were detected at concentrations below the applicable Washington State Model Toxics Control Act (MTCA) Method A cleanup levels in test pit TP01, located on the western portion of the Property, at a depth of approximately 5 feet bgs. The cPAH benzo(a)pyrene was detected at concentrations exceeding the applicable MTCA Method A cleanup level at a depth of approximately 1 foot bgs in test pits TP07 and TP10, which are located on the eastern portion of the Property. The concentration of benzo(a)pyrene detected in the soil sample collected at a depth of approximately 3 feet bgs from test pit TP07 was below the MTCA Method A cleanup level, indicating that cPAH impacts appear to be limited to the upper 1 to 2 feet of soil. Concentrations of metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver) were not detected in soil at concentrations exceeding applicable MTCA cleanup levels during this investigation.

The results of the limited subsurface soil investigation indicate that petroleum hydrocarbons and metals are not present at concentrations exceeding applicable MTCA cleanup levels in the explored areas of the Property. Elevated cPAH concentrations associated with the fill material beneath the Property were

observed in one localized area on the eastern portion of the Property at a depth of 1 foot bgs, indicating that cPAH impacts in soil are limited in lateral and vertical extent.

#### **REMAINING DATA GAPS**

#### Soil

Test pit locations during SoundEarth's 2021 limited subsurface soil investigation were selected based on the areas that are likely to be graded or excavated during planned redevelopment activities. Soil conditions beneath the northeastern, southeastern, southwestern, and central portions of the Property were not evaluated during this investigation. The results of the test pit soil sampling indicated that cPAHs were not present at concentrations exceeding the MTCA Method A cleanup level in shallow soil collected from the majority of the test pits, with the exception of two test pits advanced in a localized area in the eastern portion of the Property. Based on these findings, cPAH impacts in shallow soil beneath the Property appear to be limited in lateral and vertical extent. However, given the heterogeneous nature of fill material that is present throughout the Property, the potential presence of cPAHs in soil at concentrations exceeding applicable cleanup levels beneath the northeastern, southeastern, southwestern, and central portions of the Property remains a data gap.

#### Groundwater

Previous subsurface investigations conducted by SLR Consulting (SLR) at the west-adjacent FedEx Ground Distribution Center property have identified concentrations of dissolved arsenic exceeding the MTCA Method A cleanup level in groundwater beneath the southeastern portion of the property. Concentrations ranged from 5.6 to 86 micrograms per liter ( $\mu$ g/L). These elevated arsenic concentrations have been attributed by SLR to the upgradient Cadman Inc property, which maintains large infiltration ponds for the discharge of storm and process water to groundwater. The majority of the detected arsenic concentrations fall within the range of natural background arsenic concentrations for the Puget Sound lowlands (0.8 to 76  $\mu$ g/L), as determined by Ecology in its July 2021 draft study on Natural Background Groundwater Arsenic Concentrations in Washington State. Based on SLR's investigations, groundwater flow beneath the west-adjacent property is generally to the southeast. However, the findings of regional groundwater studies conducted by the City of Redmond have shown that groundwater flow direction in the vicinity of the Property is generally toward the west-southwest. Given the uncertainty regarding groundwater flow direction and the known presence of elevated arsenic concentrations in groundwater on the west-adjacent property, the potential presence of arsenic in groundwater beneath the Property is considered a remaining data gap.

#### **EXPOSURE PATHWAY EVALUATION**

#### **Environmental Fate and Transport**

The known and potential contaminants of concern at the Property include cPAHs in soil and arsenic in groundwater.

The principal contaminant fate and transport mechanism for cPAHs in soil at the Property is adsorption. Because cPAHs have a strong capacity for adsorption to soil and low aqueous solubility, downward leaching of cPAHs through most soil profiles is typically limited to near-surface soil (i.e., low risk of affecting groundwater quality). This is supported by the data obtained during SoundEarth's test pit evaluation, which indicate that cPAH concentrations in soil do not extend to depths greater than 1 to 2 feet bgs.

The solubility of arsenic is generally a function of pH, oxidation-reduction potential, hardness, or salinity. Arsenic is most soluble in soft, acidic waters. In general, the mobility of arsenic will increase in environments with low pH (typically pH less than 4) due to the enhanced solubility of arsenic in acidic conditions, while neutral to reducing subsurface conditions will encourage arsenic compounds to precipitate and be adsorbed to the soil.

# **Exposure Pathways**

Based on contaminant fate and transport mechanisms for cPAHs and arsenic, the environmental media of concern include near-surface soil and potentially groundwater beneath the Property.

# Soil

Soil with concentrations of cPAHs exceeding applicable MTCA Method A cleanup levels presents a potential risk to human receptors. The potential exposure pathways for soil at the Property include direct contact with soil or inhalation of airborne soil particles. The potential exposure pathways for soil are discussed in the sections below:

- Dermal Contact and Ingestion (Direct Contact) of Contaminated Soil. Soil contaminated with cPAHs is present in localized portions of the Property to an approximate depth of 2 feet bgs. This pathway may be complete for environmental field personnel and construction and utility workers who may come into contact with contaminated soil during excavation and grading activities during the planned Property redevelopment. When the Property is redeveloped, source removal and engineering controls to manage any residual soil contamination will eliminate the dermal contact pathway for potential future receptors.
- Inhalation of Airborne Soil. The exposure pathway for inhalation of airborne soil particles during excavation and construction activities on the Property may be complete for potential receptors, including environmental field personnel and construction and utility workers during redevelopment. The inhalation exposure pathway can be mitigated through the use of dust control measures during soil handling activities.

Other soil exposure pathways, including leaching to groundwater, are considered incomplete for the Property based on the available data and the fate and transport characteristics of cPAHs.

# Groundwater

Groundwater contaminated with arsenic at concentrations exceeding the MTCA Method A cleanup level that may have migrated onto the Property does not present a risk of exposure to potential human receptors given the redevelopment plans for the Property and the fate and transport characteristics of arsenic. Based on previous investigations conducted on surrounding properties, groundwater in the vicinity of the Property is present at depths of 30 feet or greater. Limited and discontinuous perched groundwater was encountered in soil borings advanced on the west-adjacent property at depths between 11 and 19 feet bgs. Groundwater is not anticipated to be encountered during the planned redevelopment work, as the maximum excavation depth is anticipated to be 9 feet bgs for the installation of a stormwater vault. Additionally, the new development will be connected to the municipal water supply, and groundwater at the Property

is not a current or future source of drinking water. As such, the exposure pathways for direct contact and ingestion of contaminated groundwater are considered incomplete.

# Vapor

The vapor inhalation pathway is considered incomplete for the Property. The contaminants of concern are not sufficiently volatile to partition from soil or groundwater and do not present a vapor intrusion risk for the future building at the Property.

# FEASIBLE REMEDY TO MITIGATE EXPOSURE RISK

Based on the planned land use for the Property, the proposed remedy to mitigate the exposure risks associated with cPAH-contaminated soil at the Property includes the management and disposal of contaminated soil that may be removed during excavation and grading associated with the planned redevelopment. Given that the planned redevelopment involves the construction of a slab-on-grade building with minimal excavation and grading for utilities and other subsurface features, it is not feasible to remove the full extent of known and potentially contaminated soil, as shown on Figure 2, in conjunction with the planned redevelopment activities. Based on the current redevelopment plans, it is estimated that approximately 50 percent of the known or potentially contaminated soil may be excavated during redevelopment activities. Any excavated soil with cPAH concentrations exceeding the MTCA Method A cleanup level will be handled as Class 3 contaminated material and will be transported to a Subtitle D landfill for proper disposal.

Any residual contaminated soil that may remain in place following redevelopment activities would be managed through the use of engineering and institutional controls. Following redevelopment, the majority of the Property will be covered by a building or a paved parking lot, which would serve as a cap preventing direct contact with the residual contaminated soil. An environmental covenant would be recorded for the Property to ensure that conditions remain protective of human health and the environment. Given the nature of the contaminants of concern for the Property and the evaluation of applicable exposure pathways, these engineering and institutional controls would effectively mitigate the exposure risk for potential receptors at the Property.

## **RISK QUANTIFICATION**

SoundEarth conducted an evaluation of the quantifiable risk associated with the proposed remedy to address cPAH-contaminated soil at the Property. Based on the available data and the vertical extent of cPAH impacts of approximately 2 feet bgs, the estimated volume of cPAH-contaminated soil potentially present at the Property is approximately 18,000 tons. The risk quantifications presented are rough order of magnitude (ROM) costs based on other project sites with similar conditions and land use. ROM costs are subject to change. The components and assumptions of the risk quantification include the following:

■ **Disposal of Contaminated Soil.** Soil removed from the Property during redevelopment activities that contains concentrations of cPAHs exceeding MTCA Method A cleanup levels would be disposed of as Class 3 material at a Subtitle D landfill. The risk quantification assumes an incremental cost of \$40 per ton for disposal of this material. Soil handling and transportation are considered development related costs and are not included in the risk quantification. Based on redevelopment plans, it is assumed that approximately 50 percent of the total estimated volume of cPAH-contaminated soil potentially present at the Property (approximately 9,000 tons) may be removed and disposed of off the Property.

- Health and Safety and Management of Contaminated Material. The risk quantification includes the anticipated incremental cost associated with handling and segregation of contaminated material during redevelopment activities, as well as the implementation of health and safety measures for environmental and construction personnel to minimize risk of exposure to contaminants during redevelopment. Waste characterization sampling and consulting support is also included in this quantification.
- Reporting, Environmental Covenant, and Regulatory Support. At the completion of redevelopment and remedial activities, a Remedial Investigation, Feasibility Study, and Cleanup Action Report would be prepared for submittal to the Washington State Department of Ecology to document the site conditions and the completed remedial action. If residual contaminated soil or arsenic-contaminated groundwater remains in place, an Environmental Covenant would be recorded for the Property.
- Data Gap Investigation. To address the remaining data gaps and further evaluate the extent of cPAH impacts in soil to refine the estimated quantities of cPAH-contaminated soil that may be removed during redevelopment activities, a supplemental subsurface investigation would be conducted, as described in the following section of this report. The investigation would also evaluate the groundwater conditions beneath the Property.

The quantified risk amounts associated with the components described above are presented in the following table:

Incremental Cost Component	Estimated Risk Amount
Disposal of Contaminated Soil (9,000 tons at \$40 per ton)	\$360,000
Health and Safety and Management of Contaminated Material	\$100,000
Reporting, Environmental Covenant, and Regulatory Support	\$50,000
Data Gap Investigation	\$35,000
Total	\$545,000

### SUMMARY OF PROPOSED SCOPE OF WORK FOR DATA GAP INVESTIGATION

To address the remaining data gaps and further evaluate the extent of cPAH-contaminated soil, SoundEarth proposes to conduct a supplemental subsurface investigation of soil and groundwater at the Property. The proposed scope of work includes the advancement of nine additional test pits in previously unexplored locations, as shown on Figure 3, to a depth of approximately 5 feet bgs. Up to two soil samples per test pit would be submitted for laboratory analysis of cPAHs.

Additionally, to evaluate the potential for arsenic in groundwater that may have migrated beneath the Property, two monitoring wells would be installed to a depth of approximately 50 feet bgs, depending on observed groundwater conditions, on the northern portion of the Property (Figure 3). The monitoring wells would be advanced using a hollow-stem auger drill rig. The monitoring wells would be developed following installation, and groundwater samples would be collected from each monitoring well using standard low-flow methodology and submitted for laboratory analysis of dissolved arsenic.

# **LIMITATIONS**

The services described in this report were performed consistent with generally accepted professional consulting principles and practices. No other warranty, expressed or implied, is made. These services were performed consistent with SoundEarth's agreement with the client. This report is solely for the use and information of SoundEarth's client unless otherwise noted. Any reliance on this report by a third party is at such party's sole risk.

Opinions and recommendations contained in this report are derived, in part, from data gathered by others, and from conditions evaluated when services were performed, and are intended only for the client, purposes, locations, time frames, and project parameters indicated. SoundEarth does not warrant and is not responsible for the accuracy or validity of work performed by others, or for the impacts of changes in environmental standards, practices, or regulations subsequent to performance of services. SoundEarth does not warrant the use of segregated portions of this report.

# **CLOSING**

SoundEarth appreciates the opportunity to provide technical services for this project. Please contact either of the undersigned at 206-306-1900 with questions.

Respectfully,

SoundEarth Strategies, Inc.

Clare Tochilin, LG

Associate Geologist

Chris Carter

Managing Principal

MTCA Cleanup Level for Soil			NE	NE	<b>0.1</b> ⁽²⁾	NE	NE	NE	NE	<b>0.1</b> ⁽²⁾

# NOTES:

Red denotes concentration exceeds MTCA cleanup level for soil.

Sample analyses conducted by Friedman & Bruya, Inc. of Seattle, WA.

Samples analyzed by EPA Method 8270E.

⁽¹⁾Analytical result for each individual cPAH is multiplied by the TEF and all seven cPAH values are added. When analytical results are reported as less than the LRL, one-half of the LRL is multiplied by the TEF to calculate the TEQ.

⁽²⁾MTCA Cleanup Regulation, Chapter 173-340-900 of WAC, Table 740-1 Method A Cleanup Levels for Soil, Unrestricted Land Uses, revised November 2007.

< = not detected at a concentration exceeding the laboratory reporting limit

cPAH = carcinogenic polycyclic aromatic hydrocarbon

EPA = US Environmental Protection Agency

MTCA = Washington State Model Toxics Control Act

NE = not established

TEF = toxicity equivalency factor

TEQ = toxicity equivalent

WAC = Washington Administrative Code
